

Semester 1		
Undergraduate professional study in computing obligatory courses		
P: Alemka Knapp P: prof. vis. šk. Ivica Levanat A: Alemka Knapp A: Diana Šaponja-Milutinović dipl. ing. fizike, pred.	Physics	ECTS: 7.0
A: Marko Milanović	Kinesiology Education I	ECTS: 1.0
P: Tihana Strmečki A: Tihana Strmečki A: Andrea Katarić	Mathematics I	ECTS: 7.0
P: Danijela Pongrac, prof. L: Danijela Pongrac, prof. L: prof. Marta Alić	Computer Applications	ECTS: 5.0
P: Mia Čarapina dipl. ing., pred. P: Ivan Cesar mag. ing. L: dr. sc. rač. Ivica Dodig, prof. v. š. A: Mia Čarapina dipl. ing., pred. L: Mia Čarapina dipl. ing., pred. A: Ivan Cesar mag. ing. L: Ivan Cesar mag. ing.	Programming	ECTS: 7.0
Undergraduate professional study in computing elective courses		
P: dr. sc. Biljana Stojaković, prof. v. š. u trajnom zvanju A: dr. sc. Ivana Špiranec prof. visoke škole A: Zoran Vulelija	English for Computing	ECTS: 3.0
P: Doc. dr. sc. Lidija Tepeš Golubić v. pred. A: Doc. dr. sc. Lidija Tepeš Golubić v. pred.	German for computing	ECTS: 3.0

Semester 2		
Undergraduate professional study in computing obligatory courses		
A: Marko Milanović	Kinesiology Education II	ECTS:1.0
P: Tihana Strmečki A: Tihana Strmečki A: Andrea Katarić	Mathematics II	ECTS:7.0
P:Dr. sc. Marko Horvat v. pred. P:Prof. dr. sc. Miroslav Slamić profesor visoke škole P: Zvonimir Štingl L:Prof. dr. sc. Miroslav Slamić profesor visoke škole L: Željko Kovačević , struč.spec.ing.techn.inf. L:Dr. sc. Marko Horvat v. pred. L: Zvonimir Štingl L:Dr. sc. Aleksandar Stojanović pred. L: Martina Petrovečki struč.spec.ing.techn.inf. L: Danko Ivošević pred.	Object Oriented Programming	ECTS:7.0
P: Željko Stojanović P:mr.sc. Goran Malčić v.pred. A: Eugen Poljičak mag.ing.eit L: Eugen Poljičak mag.ing.eit	Electrical Engineering and Electronics Basics	ECTS:7.0
P: Sanja Kraljević , dipl.ing., v. pred. P:dr. sc. Roman Domović , prof. L:dr. sc. Roman Domović , prof. L: Petar Osterman L: Sanja Kraljević , dipl.ing., v. pred.	Introduction to WEB Technologies	ECTS:5.0
Undergraduate professional study in computing elective courses		
P:dr.sc. Biljana Stojaković ,prof.v.š. u trajnom zvanju A: Lamia Egartner prof. A: Zoran Vulelija	Business English for Computing	ECTS:3.0
P: Doc. dr. sc. Lidija Tepeš Golubić v. pred. A: Doc. dr. sc. Lidija Tepeš Golubić v. pred.	Business German for computing	ECTS:3.0

Semester 3		
Computer systems and network engineering obligatory courses		
P:Prof. dr. sc. Miroslav Slamić profesor visoke škole P:Dr. sc. Marko Horvat v. pred. A:Prof. dr. sc. Miroslav Slamić profesor visoke škole L: Danko Ivošević pred.	Algorithms and Data Structures	ECTS:7.0
P:dr.sc.rač. Davor Cafuta , prof.v.šk. P:dr.sc.rač. Ivica Dodig , prof.v.š. A: Jelena Kapelac L: Jelena Kapelac	Computer Architecture	ECTS:7.0
A: Marko Milanović	Kinesiology Education III	ECTS:1.0
P:dr.sc.rač. Davor Cafuta , prof.v.šk. P:dr.sc.rač. Ivica Dodig , prof.v.š. L:dr.sc.rač. Davor Cafuta , prof.v.šk. L:dr.sc.rač. Ivica Dodig , prof.v.š.	Operating Systems	ECTS:6.0
P:v.pred. Aleksander Radovan , dipl. ing. A:v.pred. Aleksander Radovan , dipl. ing. L: Davor Lozić pred. L: Tin Kramberger struč. spec. ing. techn. inf., pred.	Java Programming	ECTS:5.0
P:dr.sc. Igor Urbiha prof.vis.šk. A:dr.sc. Igor Urbiha prof.vis.šk.	Probability and Statistics	ECTS:6.0
obligatory courses		
P:Prof. dr. sc. Miroslav Slamić profesor visoke škole P:Dr. sc. Marko Horvat v. pred. A:Prof. dr. sc. Miroslav Slamić profesor visoke škole L: Danko Ivošević pred.	Algorithms and Data Structures	ECTS:7.0
P:dr.sc.rač. Davor Cafuta , prof.v.šk. P:dr.sc.rač. Ivica Dodig , prof.v.š. A: Jelena Kapelac L: Jelena Kapelac	Computer Architecture	ECTS:7.0
A: Marko Milanović	Kinesiology Education III	ECTS:1.0
P:dr.sc.rač. Davor Cafuta , prof.v.šk. P:dr.sc.rač. Ivica Dodig , prof.v.š. L:dr.sc.rač. Davor Cafuta , prof.v.šk. L:dr.sc.rač. Ivica Dodig , prof.v.š.	Operating Systems	ECTS:6.0
P:v.pred. Aleksander Radovan , dipl. ing. A:v.pred. Aleksander Radovan , dipl. ing. L: Davor Lozić pred. L: Tin Kramberger struč. spec. ing. techn. inf., pred.	Java Programming	ECTS:5.0
P:dr.sc. Igor Urbiha prof.vis.šk. A:dr.sc. Igor Urbiha prof.vis.šk.	Probability and Statistics	ECTS:6.0

Semester 4		
Computer systems and network engineering obligatory courses		
P: Tin Kramberger struč. spec. ing. techn. inf., pred. L: Renata Kramberger A: Tin Kramberger struč. spec. ing. techn. inf., pred. L: Tin Kramberger struč. spec. ing. techn. inf., pred. L: Brigitta Cafuta	Databases	ECTS:5.0
A: Marko Milanović	Kinesiology Education IV	ECTS:1.0

Code WEB/ISVU	23776/170052	ECTS	5.0	Academic year	2018/2019
Name	Advanced Databases				
Status	5th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course 5th semester - (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			15+45 (15+30+0+0) 90	
Teachers	Lectures: Sanja Kraljević , dipl.ing., v. pred. Auditory exercises: Sanja Kraljević , dipl.ing., v. pred. Laboratory exercises:1. Sanja Kraljević , dipl.ing., v. pred. Laboratory exercises: Jakob Gračanin				
Course objectives	To introduce students to objects and control of data access , the basics of programming MySQL servers and implementation of a database into an information system.				
Learning outcomes:	<ol style="list-style-type: none"> 1.ability to compare different types of server-client architectures. Level:6,7 2.ability to remove database malfunctions. Level:6 3.ability to estimate the efficiency of a database model in an information system. Level:6,7 4.ability to distinguish between the structures of a centralised and a distributed database. Level:6 5.ability to compare the mechanisms used in database management. Level:6,7 6.ability to create objects by using a query language (SQL). Level:6 7.ability to develop the stored data (functions, procedures, triggers) by using advanced SQL techniques . Level:6,7 8.ability to control the flow and redirection of the SQL code flow. Level:6,7 9.ability to devise the control of a parallel data access by using various techniques: data locking, locking granularity and defining a level of data isolation. Level:6,7 10.ability to control the permissions to and levels of data access . Level:6,7 11.ability to distinguish between the requests of a transaction system and those of a data warehousing system. Level:6 12.ability to identify the necessity for getting prompt information by using systems of business intelligence. Level:6 				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Discussion Questions and answers				
Methods of carrying out auditory exercises	Group problem solving Discussion, brainstorming Computer simulations Interactive problem solving				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Laboratory exercises, computer simulations Group problem solving Discussion, brainstorming Interactive problem solving				
Course content lectures	<ol style="list-style-type: none"> 1. Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector Tools
Exam literature	Basic literature: 1. Skripta iz kolegija, prezentacije s predavanja 2. MySQL Documentation: MySQL Reference Manuals Additional literature: 1. Manger; R.: Baze podataka, skripta, Sveučilište u Zagrebu, Prirodoslovno Matematički fakultet, drugo izdanje, Zagreb, 2014. 2. Balling, D. J. ; Zawodny, J.: High Performance MySQL, O'Reilly, 2015. 3. Vaswani, V.; MySQL Database Usage Administration, McGraw-Hill Osborne Media, 2010. 4. Cabral, S.; Murphy, K.: MySQL Administrator's Bible, Wiley Publishing, Inc., Indianapolis, Indiana, 2009. 5. Ramakrishnan, R.; Gehrke, J.: Database Management Systems, 3rd Edition, McGraw- Hill, New York, 2003. 6. Sumathi, S.; Esakkirajan, S.: Fundamentals of Relational Database Management Systems, Springer, Verlag Berlin Heidelberg, 2007.
Students obligations	1. Done laboratory exercises (tolerance 1/6 absences). 2. Achieved minimum of 15 points of laboratory exercises (out of 50).
Knowledge evaluation during semester	Short exam is written on each laboratory exercises: holds 8 points, in each of the five labs (except laboratory exercise zero) can be won up to 8 points -> maximum 40 points from all exercises, exception: laboratory exercise zero holds 10 points. Distribution of total number of points from mid-term exams: 25% first mid-term exam, 25% second mid-term exam, 10% laboratory exercise zero, 40% remaining laboratory exercises. The first and second mid-term exam include material previously handled in lectures and laboratory exercises. Pass -> 50 % (50 bodova), Best results -> will be exempt from second mid term exam with "excellent (5)" grade, (criterion is the maximum number of points in two mid term exams and all labs, minus 10%).
Knowledge evaluation after semester	Written and oral exam. Final grade from written exam: 60% written exam, 40% laboratory exercises.
Student activities:	Aktivnost ECTS (Written exam) 5
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have completed Baze podataka
Proposal made by	Sanja Duk, dipl. ing.

Course content laboratory	<ol style="list-style-type: none"> 1.No class, 2h 2.No class, 2h 3.JavaScript, 2h, Learning outcomes:1,2 4.AngularJS - uvod, 2h, Learning outcomes:3,4,7 5.AngularJS - moduli i direktive, 2h, Learning outcomes:3,4,7 6.AngularJS - filteri, servisi, \$http, 2h, Learning outcomes:3,4,7 7.AngularJS i forme, 2h, Learning outcomes:3,4 8.Node.js, 2h, Learning outcomes:3,5 9.Express, 2h, Learning outcomes:3,5 10.MongoDB, 2h, Learning outcomes:4,6 11.Project, 2h, Learning outcomes:3,4,5,7 12.Project, 2h, Learning outcomes:3,4,5,7 13.Project, 2h, Learning outcomes:3,4,5,7 14.No class, 2h 15.No class, 2h 				
Required materials	General purpose computer laboratory Whiteboard with markers Overhead projector				
Exam literature	<ol style="list-style-type: none"> 1. "Eloquent JavaScript: A Modern Introduction to Programming" Marijn Haverbeke 2. "Pro AngularJS" Adam Freeman 3. "Professional Node.js" Pedro Teixeira 4. "Mean Machine" Chris Sevilleja, Holly Lloyd 				
Students obligations	Regular attendance of classes and lectures				
Knowledge evaluation during semester	Regular attendance, programming exercises and quizzes in labs, project				
Knowledge evaluation after	Written and oral exam, project				

semester	
Student activities:	Aktivnost (Practical work) ECTS 2 (Project) 3
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Baze podataka Students cannot enroll in this course unless they have passed Uvod u web tehnologije Students cannot enroll in this course unless they have passed Programiranje u jeziku Java
Proposal made by	dipl. ing. Ognjen Staničić , 11.5.2016

Code WEB/ISVU	23778/170054	ECTS	5.0	Academic year	2018/2019
Name	Advanced Programming in Python				
Status	5th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course 5th semester - (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (0+30+0+0) 90	
Teachers	Lectures: Prof. dr. sc. Miroslav Slamić profesor visoke škole Lectures: Dr. sc. Aleksandar Stojanović pred. Laboratory exercises: Dr. sc. Aleksandar Stojanović pred.				
Course objectives	1) acquire basic skills in programming in Python by applying it in various types of problems, 2) practice problem solving, 3) get familiar with useful areas of computer science				
Learning outcomes:	1. write the program. Level: 6,7 2. design system architecture. Level: 6 3. build a system for a simple query language. Level: 6,7 4. identify system components. Level: 6 5. analyze system requirements and functionality. Level: 6				
Methods of carrying out lectures	Ex cathedra teaching Case studies Modelling Discussion Questions and answers				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment				
Course content lectures	1. Introduction to Python, 2h, Learning outcomes: 1 2. Built-in data structures: Lists, tuples, maps and sets, 2h, Learning outcomes: 1 3. Input/output, files and exceptions, 2h, Learning outcomes: 1 4. Higher-order functions and recursion, 2h, Learning outcomes: 1 5. Example of higher-order functions: Number system conversion, 2h, Learning outcomes: 1 6. Example of recursion: Pattern matching, 2h, Learning outcomes: 1 7. Environments, 2h, Learning outcomes: 1,2,3,4,5 8. Classes and objects, 2h, Learning outcomes: 1,2,3,4,5 9. Example of classes and objects: Logic circuit simulator, 2h, Learning outcomes: 1,2,3,4,5 10. Iterators and the , 2h, Learning outcomes: 1,2,3,4,5 11. Example of classes, objects and iterators: Implementation of relational algebra operators for data retrieval, 2h, Learning outcomes: 1,2,3,4,5 12. Using Python for language processing: Fundamentals of grammars, finite state automata and regular expressions, 2h, Learning outcomes: 2,3,4,5 13. Example: Parsing textual data, 2h, Learning outcomes: 1,2,3,4,5 14. Example: Interpreter for a simple programming language, 2h, Learning outcomes: 1,2,3,4,5 15. Overview of selected advanced parts of Python, 2h, Learning outcomes: 1,2,3,4,5				
Course content laboratory	1. Introduction to Python: Lab assignments, 2h, Learning outcomes: 1 2. Built-in data structures: Lists, tuples, maps and sets: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 3. Input/output, files and exceptions: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 4. Higher-order functions: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 5. Recursion: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 6. Recursion: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 7. Environments: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 8. Classes and objects: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 9. Classes and objects: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 10. Iterators and the , 2h, Learning outcomes: 1,2,3,4,5 11. Parsing textual data: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 12. Parsing textual data: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5 13. Interpreter for a simple programming language: Work on implementation, 2h, Learning outcomes: 1,2,3,4,5 14. Interpreter for a simple programming language: Work on implementation, 2h, Learning outcomes: 1,2,3,4,5 15. Overview of selected advanced parts of Python: Lab assignments, 2h, Learning outcomes: 1,2,3,4,5				
Required materials	General purpose computer laboratory Overhead projector

Code WEB/ISVU	23626/156483	ECTS	7.0	Academic year	2018/2019
Name	Algorithms and Data Structures				
Status	3rd semester - Computer systems and network engineering (Izvanredni raarstva) - obligatory course3rd semester - (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+45 (15+30+0+0) 135	
Teachers	Lectures:1. Prof. dr. sc. Miroslav Slamić profesor visoke škole Lectures:3. Dr. sc. Marko Horvat v. pred. Auditory exercises:Prof. dr. sc. Miroslav Slamić profesor visoke škole Laboratory exercises: Danko Ivošević pred.				
Course objectives	To transfer to students the basic knowledge related to standard data structures (lists, stacks, queues, binary trees) and algorithms used for work with data structures in C, C++, C# and Java				
Learning outcomes:	1.ability to compare the present algorithms; to analyse complex algorithms. Level:6,7 2.ability to develop complex recursive algorithms. Level:6,7 3.ability to create solutions based on simple data structures (lists, stacks, queues). Level:6,7 4.ability to devise solutions based on complex data structures (trees, piles and priority queue). Level:6,7 5.ability to propose the best program solutions based on sort algorithms . Level:6,7 6.ability to combine the best methods of browsing and using addressing techniques . Level:6,7				
Methods of carrying out lectures	Ex cathedra teaching Case studies Discussion				
Methods of carrying out auditory exercises	Group problem solving Traditional literature analysis Discussion, brainstorming				
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations				
Course content lectures	1.Structured and unstructured data. Definitions of algorithms, history, conventions and writing algorithms., 2h, Learning outcomes:1 2.Algorithm complexity, 2h, Learning outcomes:1 3.Application of recursion in algorithms, 2h, Learning outcomes:2 4.Simple data structure. Static and dynamic data structures, 2h, Learning outcomes:1,3 5.Single and double linked lists, 2h, Learning outcomes:2,3 6.Data structure type Stack, 2h, Learning outcomes:3 7.Data structure type Queue, 2h, Learning outcomes:3 8.Complex Data Structures - Trees, 2h, Learning outcomes:4 9.Binary Tree, 2h, Learning outcomes:4 10.The heap and the priority queue as a binary tree, 2h, Learning outcomes:4 11.Simple sort algorithms., 2h, Learning outcomes:1,5 12.Fast sorting algorithms , 2h, Learning outcomes:1,4,5 13. Search algorithms. Sequential search, binary search and BST, 2h, Learning outcomes:4,5 14.Techniques of direct addressing and indexing, 2h, Learning outcomes:5,6 15.Hashing addressing. Applying Hash functions in the encryption of data, 2h, Learning outcomes:5				
Course content auditory	1.Fundamentals of mathematical algorithms., 1h, Learning outcomes:1 2.Analysis of the complexity of the algorithms., 1h, Learning outcomes:1 3.Implementation and analysis of recursion., 1h, Learning outcomes:2 4.Modeling simple data structure, 1h, Learning outcomes:1,3 5.Implementing the list (single and double linked). Implementation by array., 1h, Learning outcomes:2,3 6.Implementation of the stack., 1h, Learning outcomes:3 7.Implementation of the queue., 1h, Learning outcomes:3 8.Modeling of complex data structure of a tree., 1h, Learning outcomes:4 9.Implementation of the binary tree., 1h, Learning outcomes:4 10.Implementation of the priority queue and heap., 1h, Learning outcomes:4 11.Implementation of the simple sort algorithms., 1h, Learning outcomes:1,5 12.Implementation of the fast sort algorithms., 1h, Learning outcomes:1,4,5 13.Binary and sequential search., 1h, Learning outcomes:3,4 14.Implementing the techniques of direct addressing., 1h, Learning outcomes:5,6 15.Implementation techniques of Hash addressing., 1h, Learning outcomes:6				
Course content laboratory	1.Programming basic mathematical algorithms., 2h, Learning outcomes:1 2.Programming analysis of the complexity of the algorithms., 2h, Learning outcomes:1 3.Programming implementation and analysis of recursion., 2h, Learning outcomes:2 4.The programming model of simple data structures, 2h, Learning outcomes:1,3 5.Programming implementation of list (single and double linked). Implementation by array., 2h, Learning outcomes:2,3 6.Programming implementation of stack., 2h, Learning outcomes:3 7.Programming implementation of queue., 2h, Learning outcomes:3 8.The programming model complex data structure of a tree., 2h, Learning outcomes:4 9.Programming implementation of a binary tree., 2h, Learning outcomes:4 10.Programming implementation of a heap and priority queue., 2h, Learning outcomes:4 11.Programming implementation of of algorithms for sorting small arrays., 2h, Learning outcomes:5 12.Programming implementation of of fast algorithms for sorting large sequences., 2h, Learning outcomes:1,4,5 13.Software solution binary and sequential search., 2h, Learning outcomes:4,5 14.Programming implementation of techniques of direct addressing., 2h, Learning outcomes:5,6				

	15.Programming implementation of techniques Hash addressing., 2h, Learning outcomes:6																
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector																
Exam literature	Basic literature: 1. R. Sedgewick: Algorithms in C/C++, Parts 1-4: Fundamentals, Data Structure, Sorting, Searching, Third Edition.. Additional literature: 2. Robert L. Status	2nd semester - Undergraduate professional study in computing (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (30+0+0+0) 30	
Teachers	Lectures:1. dr.sc. Biljana Stojaković ,prof.v.š. u trajnom zvanju Auditory exercises: Lamia Egartner prof. Auditory exercises: Zoran Vulelija				
Course objectives	To develop students English language skills: oral and written communication in the field of expertise, presentation of oneself/company				
Learning outcomes:	<p>1.ability to analyse the position of the English language in the business world. Level:6 2.to compare Croatian and English non-finite forms. Level:6,7 3.to identify various non-finite forms in English. Level:6 4.to integrate IT terminology into new contexts. Level:6,7 5.ability to generate a business letter, a business e-mail, an order, an invoice, etc. . Level:6,7 6.to make a difference between formal an informal email. Level:6 7.ability to relate the levels of ICT education in the English speaking countries and in Croatia. Level:6,7 8.ability to relate jobs in ICT in the English speaking countries and in Croatia. Level:6,7 9.ability to relate academic degrees in ICT education in the English speaking countries and in Croatia. Level:6,7 10.ability to distinguish between high and low quality of business correspondence in English. Level:6 11.ability to give a presentation of a company in English. Level:6,7 12.to make a difference between various forms of word formation in English. Level:6 13.ability to analyse the characteristics of a job interview. Level:6 14.ability to present in English content related to the field of expertise . Level:6,7 15.ability to generate a job application letter and a CV. Level:6,7 16.ability to analyse the differences between oral and written business communication (verbal/nonverbal; synchronous/asynchronous) . Level:6 17.to analyse various types of business correspondence. Level:6 18.to analyse phraseology in communication via phone. Level:6</p>				
Involvement of learning outcomes of the course in study programme:	1.1.OPCI Služiti se stranim jezikom u literaturi i svakodnevnoj stručnoj komunikaciji. : 90h in 90h				
Methods of carrying out lectures	<p>Ex cathedra teaching Guest lecturer Case studies Demonstration Discussion Questions and answers Seminar, students presentation and discussion Homework presentation - Lectures are given in an interactive way: students are constantly asked questions on the subject being taught; they are asked to give comments and examples of their own and to draw conclusions. - Straightforward presentations, involving writing on the board, and using key examples from the reading and listening texts. - Teaching equipment: board, overhead projector, LCD projector, tape-recorder.</p>				
Methods of carrying out auditory exercises	<p>Group problem solving Traditional literature analysis Data mining and knowledge discovery on the Web Essay writing Discussion, brainstorming Interactive problem solving Workshop Exercising language patterns through various types of tasks:Reading for information; Listening for specific information;The opinion exchange tasks;Asking and answering the questions; Fill in the most appropriate tense...; Translation exercises; Vocabulary exercises (crosswords, word games);Comparing various sources of information, Writing descriptions of computing processes; Writing dialogues (group work); Keeping their own vocabulary notebooks</p>				
Course content lectures	<p>1.Non-finite forms, 2h, Learning outcomes:2,14 2.Croatian and English non-finite forms, 2h, Learning outcomes:2,3,14 3.Business correspondence, 2h, Learning outcomes:1,9,14,16,17 4.Formal and informal email, 2h, Learning outcomes:6,10,14,16 5.Types of business letter , 2h, Learning outcomes:10,14,16,17 6.Job application letter, 2h, Learning outcomes:10,14,16,17 7.CV, 2h, Learning outcomes:10,14,16,17 8.Business Offer, 2h, Learning outcomes:10,14,16,17 9.Preliminary exam, 2h, Learning outcomes:3,15 10.IT education levels in the world, 2h, Learning outcomes:7,8,9 11.Presenting a company, 2h, Learning outcomes:11,14 12.Phraseology in communicatin via phone, 2h, Learning outcomes:14,16,18 13.Job interview, 2h, Learning outcomes:13,14 14.Job interview, 2h, Learning outcomes:13,14 15.Preliminary exam, 2h, Learning outcomes:7,8,9,11,13,14,16,18</p>				
Course content auditory	<p>1.Operating systems; non-finite forms (introduction), 2h, Learning outcomes:2,3,4,14 2.Word processing; non-finite forms (exercises), 2h, Learning outcomes:2,3,4,14 3.Spreadsheets and databases; vocabulary exercises, 2h, Learning outcomes:4,5,14 4.Internet and email; writing business email, 2h, Learning outcomes:4,5,6,9,14,15</p>				

	5.The Web; word formation; writing a business letter (basics), 2h, Learning outcomes:4,5,8,14,15 6.Jobs in ICT; prefixation in IT terminology; applying for a job, 2h, Learning outcomes:3,4,8,14,15 7.Graphics and design; writing a CV, 2h, Learning outcomes:4,5,8,14,15 8.Dtp and multimedia; writing a business offer, 2h, Learning outcomes:4,5,9,14,15 9.Preliminary exam, 2h, Learning outcomes:4,14 10.Web design; word formation, 2h, Learning outcomes:4,11,14 11.Program design and computer languages; Java; prefixation in IT terminology, 2h, Learning outcomes:4,11,14 12.Internet security; suffixation in IT terminology, 2h, Learning outcomes:4,11,14 13.Networks; compounding in IT terminology, 2h, Learning outcomes:4,11,14 14.New technologies; vocabulary exercises, 2h, Learning outcomes:4,11,14 15.Preliminary exam, 2h, Learning outcomes:4,11,13,14
Required materials	Basic: classroom, blackboard, chalk... Whiteboard with markers Overhead projector Video equipment Operating supplies Exercising language patterns through various types of tasks:Reading for information; Listening for specific information;The opinion exchange tasks;Asking and answering the questions; Fill in the most appropriate tense...; Translation exercises; Vocabulary exercises (crosswords, word games);Comparing various sources of information, Writing descriptions of computing processes; Writing dialogues (group work); Keeping their own vocabulary notebooks
Exam literature	Basic literature: 1. E.M.Fabre, S.R.Esteras, Professional English in Use ICT, Cambridge University Press 2. materijali s predavanja (objavljeni na web stranicama kolegija) sastavljeni od tekstova preuzetih iz suvremene stručne i metodičke literature 3. Ashley, A.A. Handbook of Commercial Correspondence. OUP, 2000
Students obligations	Regular attendance in classes (maximum of 3 absences from exercises are tolerated)
Knowledge evaluation during semester	2 preliminary exams in both lectures and exercises
Knowledge evaluation after semester	Written and oral exam
Student activities:	Aktivnost ECTS (Written exam) 3
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.
Proposal made by	Professor Biljana Stojaković, PhD

Code WEB/ISVU	23237/143164	ECTS	3.0	Academic year	2018/2019
Name	Business German for computing				
Status	2nd semester - Undergraduate professional study in computing (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (30+0+0+0) 30	
Teachers	Lectures:1. Doc. dr. sc. Lidija Tepeš Golubić v. pred. Auditory exercises: Doc. dr. sc. Lidija Tepeš Golubić v. pred.				
Course objectives	To develop students language skills, use basic business terminology				
Learning outcomes:	1.ability to formulate a CV and a job application letter in English. Level:6,7 2.ability to analyse texts related to the field of expertise and check the predefined theses in order to motivate students to take a critical attitude toward the texts. Level:6 3.ability to give a presentation in German. Level:6,7 4.ability to write a summary and a report of a text . Level:6,7 5.ability to write a business letter, an application, etc. . Level:6,7 6.ability to give a task based presentation in German. Level:6,7 7.ability to develop language skills in business communication; to use basic business terminology. Level:6,7 8.ability to combine the acquired knowledge with the English language in computing. Level:6,7				
Involvement of learning outcomes of the course in study programme:	1.1.OPĆI Služiti se stranim jezikom u literaturi i svakodnevnoj stručnoj komunikaciji. : 62h in 90h 2.2.OSOBNE Odgovornost, dosljednost, točnost, ažurnost.: 10h in 90h 2.7.OSOBNE Predstavljanje informacija, ideja, problema i rješenja stručnoj i općoj publici.: 6h in 90h 2.9.OSOBNE Profesionalna i ljudska osobnost.: 6h in 90h 2.11.OSOBNE Otvorenost za nova znanja, iskustva i kulturne okolnosti.: 6h in 90h

Course content lectures	1.Boolean functions and algebra, 3h, Learning outcomes:5 2.The conversion logic circuits in the form using only NAND and NOR gates, 3h 3.Minimization of logic functions, 3h, Learning outcomes:5 4.Combination circuits, 3h, Learning outcomes:1,4 5.Flip-flops, 3h 6.Von Neumann model of computer architecture, 2h 7.Atmel AVR computer architecture, 3h 8.AVR microcontroller programming, 3h, Learning outcomes:5,6 9.AVR computer architecture commands, 5h, Learning outcomes:4,5 10.Assembler program examples, 2h, Learning outcomes:2 11.AVR directives and operators, 3h, Learning outcomes:2 12.C - Assembler relation, 2h, Learning outcomes:3 13.Input-output data transfer, 3h, Learning outcomes:3 14.Memory hierarchy, 3h, Learning outcomes:6 15.Virtual memory, 3h, Learning outcomes:6				
Course content auditory	1.No classes, 1h 2.Boolean algebra, logical functions and circuit, 1h, Learning outcomes:4 3.Conversion of functions into the NI or NILI form, 1h, Learning outcomes:4,5 4.Minimizing logical functions, 1h, Learning outcomes:5 5.First partial exam, 1h, Learning outcomes:4,5 6.Combination circuits, 1h, Learning outcomes:1,4 7.Flip-flops, 1h, Learning outcomes:3,4 8.Simple assembler programs, 1h, Learning outcomes:2 9.Second partial exam, 1h, Learning outcomes:1,2,4 10.Complex assembler programs, 1h, Learning outcomes:2 11.Subroutines and macro instructions, 1h, Learning outcomes:2,3 12.Operations with memory, 1h, Learning outcomes:2,3 13.Interruption system, 1h, Learning outcomes:2,3 14.No classes, 1h, Learning outcomes:4 15.Final Exam, 1h, Learning outcomes:2,3				
Course content laboratory	1.No classes, 2h 2.No classes, 2h 3.Boolean algebra, logical functions and circuit, 2h, Learning outcomes:4 4.Conversion of functions into the NI or NILI form, 2h 5.Minimizing logical functions, 2h, Learning outcomes:5 6.Combination circuits, 2h, Learning outcomes:1,4 7.Flip-flops, 2h 8.Compensation of missed exercises, 2h, Learning outcomes:1,4,5 9.No classes, 2h 10.Simple assembler programs, 2h, Learning outcomes:2 11.Complex assembler programs, 2h, Learning outcomes:2 12.Subroutines and macro instructions, 2h, Learning outcomes:2 13.Operations with memory, 2h, Learning outcomes:2 14.Interruption system, 2h, Learning outcomes:2				

	15.Compensation of missed exercises, 2h, Learning outcomes:2
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Overhead projector
Exam literature	Basic literature: S. Ribarić, Arhitektura mikroprocesora, Tehnicka knjiga, Zagreb, 1990. U. Peruško, Digitalna elektronika, Školska knjiga Zagreb, 1993. John L. Hennessy, David A. Patterson, Computer Architecture: A Quantitative Approach; Fifth Edition, Morgan Kaufmann, 2011. AVR ATmega128 Instruction Set Dodatna: S. Ribarić, Arhitektura racunala RISC i CISC, Školska knjiga, Zagreb, 1996. S. Ribarić, Naprednije arhitekture mikroprocesora, Element, Zagreb, 1997. L. Budin, Mikroracunala i mikroupravljači, Element, Zagreb, 1997. Marko Čupić: Zbirka riješenih zadataka iz Digitalne elektronike i Digitalne logike, Zagreb, 2005. Myke Predko: Digital Electronics Demystified, McGraw Hill, 2006. Gnter Schmitt: Mikrocomputertechnik mit Controllern der Atmel AVR-RISC-Familie, Oldenbourg Verlag Mnchen, 2010.
Students obligations	Solving ten laboratory exercises.
Knowledge evaluation during semester	Ten laboratory exams - 6 points each Two partial exams - 10 points each Final exam - 20 points Optional points for additional effort Every partial exam has a correctional exam Maximum 100 points 0-49 - not good enough 50-61 - sufficient 62-74 - good 75-86 - very good 87-100 - excellent
Knowledge evaluation after semester	Written exam is evaluated with 40 points, and remaining 60 points are transferred from the achievement on laboratory exams during the semester time.
Student activities:	Aktivnost ECTS (Written exam) 7
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.
Proposal made by	Jelena Kapelac

Course objectives	Students need to grasp the concept, properties and role of databases and data mining systems in an information system. Practical work with the database management system will enable them to qualify students to familiarize themselves and master different methods of handling databases.				
Learning outcomes:	1.ability to build a database model. Level:6,7 2.ability to design normalized database. Level:6 3.ability to create basic SQL queries. Level:6,7 4.ability to construct SQL queries with data filtering. Level:6,7 5.ability to control embedded SQL functions. Level:6,7 6.ability to connect multiple data tables using SQL queries. Level:6,7 7.ability to sort and group data retrieved by a query. Level:6 8.ability to compare an outer SQL query with an inner SQL query. Level:6,7 9.ability to organize and optimize the database using indexes. Level:6,7

Knowledge evaluation during semester

Code WEB/ISVU	23635/157079	ECTS	7.0	Academic year	2018/2019
Name	Electrical Engineering and Electronics Basics				
Status	2nd semester - Undergraduate professional study in computing (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			45+45 (30+15+0+0) 120	
Teachers	Lectures:1. Željko Stojanović Lectures:2. mr.sc. Goran Malčić v.pred. Auditory exercises: Eugen Poljičak mag.ing.eit Laboratory exercises: Eugen Poljičak mag.ing.eit				
Course objectives	Student should obtain an overview over contemporary electronic devices and master basic circuit analysis methods in order to evaluate the performance of electronic products.				
Learning outcomes:	<p>1. Formulate a mathematical solution to a electric circuit or its part by using basic methods of circuit analysis (Kirchhoff's laws and phasors).. Level:6,7</p> <p>2. Include the features of nonlinear and multipole electronic components into a mathematical solution to a circuit.. Level:6,7</p> <p>3. Calculate currents and voltages in simple electronic and electrical circuits with several components.. Level:6</p> <p>4. Draw a scheme of basic electrical and electronic circuits.. Level:6</p> <p>5. Sketch a graph of a sinusoidal signal from a given equation and vice versa.. Level:6</p> <p>6. Draw symbols and characteristics of basic electronic components.. Level:6</p> <p>7. Design a simple electronic circuit (digital switch, amplifier, comparator and trigger, rectifier, stabilizer, filter, indicator light, heater, multivibrator, A/D converter, SH circuit).. Level:6</p> <p>8. Conduct laboratory measurements of basic quantities in electrical circuits (current, voltage, waveform with its characteristic values, time relationships).. Level:6,7</p> <p>9. Analyse electrical circuits by using simple simulation programs.. Level:6</p> <p>10. Estimate the value of a physical quantity in an electrical circuit, based on physical laws and environment influence.. Level:6,7</p>				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Discussion				
Methods of carrying out auditory exercises	Group problem solving Discussion, brainstorming Other Short tests.				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Laboratory exercises, computer simulations Computer simulations				
Course content lectures	<p>1. Introduction. Basic concepts. Resistors., 3h, Learning outcomes:1,4,6,10</p> <p>2. Basic electricity laws. Basic electrical instruments and power sources. Electrical work, energy and power., 3h, Learning outcomes:1,3,4,7,10</p> <p>3. Electrostatics. Capacitance., 3h, Learning outcomes:1,3,6,10</p> <p>4. Capacitors. RC circuits., 3h, Learning outcomes:1,3,4,6,7,10</p> <p>5. Magnetism, magnetic force, electric motors., 3h, Learning outcomes:1,7,10</p> <p>6. Electromagnetic induction, self induction, mutual induction. Alternating current, generator, transformer., 3h, Learning outcomes:1,4,5,6,7,10</p> <p>7. Alternate current responses of resistor, condenser and inductor. Apparent, reactive and real power. Application of phasor calculus., 3h, Learning outcomes:1,3,4,7,10</p> <p>8. Concept, disciplines and history of electronics. Nonlinear and multiport elements in circuits. Fundamentals of semiconductors., 3h, Learning outcomes:1,2,3,4,6,7,9,10</p> <p>9. PN-junction. Diodes., 3h, Learning outcomes:1,2,3,4,6,7,10</p> <p>10. Applications of diodes: rectifiers, stabilizers and limiters., 2h, Learning outcomes:1,2,3,4,6,7,10</p> <p>Transistors: basic concepts and types., 1h, Learning outcomes:2,3,4,6,7,10</p> <p>11. Bipolar transistors and applications., 3h, Learning outcomes:1,2,3,4,6,7,10</p> <p>12. Unipolar transistors and applications., 2h, Learning outcomes:1,2,3,4,6,7,10</p> <p>Amplifiers: concepts, cascading and decibels., 1h, Learning outcomes:1,3,4,7,10</p> <p>13. Operational amplifiers., 3h, Learning outcomes:1,3,4,6,7,10</p> <p>14. Multivibrators: bistable, monostable, astable. Schmitt trigger., 3h, Learning outcomes:1,3,4,6,7,10</p> <p>15. A/D converters. SH circuits., 3h, Learning outcomes:1,3,4,6,7,10</p>				
Course content auditory	<p>1. Physical quantities and units. Ohms law and resistors., 2h, Learning outcomes:1,3,4,6,7,10</p> <p>2. Serial and parallel connections of resistors. Analysis of circuits by Kirchhoffs laws., 2h, Learning outcomes:1,3,4,6,7,10</p> <p>3. Analysis of circuits by Kirchhoffs laws. Voltage loss, open circuit, short circuit., 2h, Learning outcomes:1,3,4,7,10</p> <p>4. Voltage loss, open circuit, short circuit. Electrical work, energy and power., 2h, Learning outcomes:1,3,4,7,10</p> <p>5. Electrical work, energy and power. Electrostatics., 2h, Learning outcomes:1,3,4,6,7,10</p> <p>6. RC-circuits and battery - charging and discharging., 2h, Learning outcomes:1,3,4,6,7,10</p> <p>7. Magnetic force, electric motors., 2h, Learning outcomes:1,3,4,10</p> <p>8. Induced voltage., 2h, Learning outcomes:1,3,4,6,7,10</p> <p>9. Sinusoidal steady-state in basic RLC circuits., 2h, Learning outcomes:1,3,4,5,7,10</p> <p>10. Application of phasor calculus. Ideal transformer., 2h, Learning outcomes:1,3,4,5,6,7,10</p> <p>11. Diode circuits. Stabilizers., 2h, Learning outcomes:1,2,3,4,6,7,10</p> <p>12. Circuits with bipolar transistors., 2h, Learning outcomes:1,2,3,4,6,7,10</p> <p>13. Bipolar transistor switch and amplifier., 2h, Learning outcomes:1,2,3,4,6,7,10</p> <p>14. Operational amplifiers - basic properties and circuits., 2h, Learning outcomes:1,2,3,4,6,7,10</p>				

	15. Multivibrators and triggers., 2h, Learning outcomes:1,2,3,4,6,7,10
Course content laboratory	1.No lessons 2.No lessons 3.No lessons 4.Kirchhoffs laws, 2h, Learning outcomes:1,3,6,8,10 5.No lessons 6.No lessons 7.RC- circuits responses, 2h, Learning outcomes:6,8,10 8.No lessons 9.No lessons 10.No lessons 11.No lessons 12.Diode and rectifiers, 2h, Learning outcomes:4,6,8,10 13.Bipolar junction transistor switch, 2h, Learning outcomes:4,6,8,10 14.Operational amplifier, 2h, Learning outcomes:3,4,6,8,10 15.Use of simulation programs in electrical and electronics engineering, 2h, Learning outcomes:3,7,9,10
Required materials	Basic: classroom, blackboard, chalk... Special purpose laboratory General purpose computer laboratory Overhead projector Video equipment
Exam literature	Osnovna: 1. E. Stanić: Osnove elektrotehnike, Školska knjiga 2. J. Grilec, D. Zorc: Osnove elektronike, Školska knjiga Additional literature: 1. M. Nahvi, J.A. Edminister: Schaum's Outline of Electric Circuits, McGraw-Hill
Students obligations	Laboratory attendance (100%) and minimal total score (25%) during the semester.
Knowledge evaluation during semester	Written tests (2) 90 points Laboratory work (5) 10 points Total 100 points Final grade with minimum of 8 points of laboratory work and each written test with minimum of 50% : 63-76 points (3) 76-90 points (4) 90-100 points (5) Written test grades without of minimum of 8 points of laboratory work or each written test with minimum of 50% : kolokviju: 50-63 points (2) 63-76 points (3)
Knowledge evaluation after semester	Written exam and oral exam. Minimum of 50% from written exam required for attending oral exam. Ocjene less than 50 % (1) from 50 to 62 % (2) from 62 to 73 % (3) from 73 to 88 % (4) from 89 to 100 % (5) Optional seminar work.
Student activities:	Aktivnost (Classes attendance) ECTS 1 (Experimental work) 1 (Constantly tested knowledge) 5
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.
ISVU equivalents:	143157;
Proposal made by	Željko Stojanović, 01. June 2018.

Code WEB/ISVU	23230/143143	ECTS	3.0	Academic year	2018/2019
Name	English for Computing				
Status	1st semester - Undergraduate professional study in computing (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (30+0+0+0) 30	
Teachers	Lectures:2. dr.sc. Biljana Stojaković ,prof.v.š. u trajnom zvanju Auditory exercises:dr.sc. Ivana Špiranec prof. visoke škole Auditory exercises: Zoran Vulelija				
Course objectives	To develop language skills related to developing skills of understanding native and non-native English speakers and original texts; learning how to use various dictionaries; developing communicating skills. To develop students				
Learning outcomes:	<p>1.ability to analyse the position of the English language and its importance in the field of expertise (computing) and in global communication. Level:6</p> <p>2.ability to generate individually oral and written communication in English. Level:6,7</p> <p>3.ability to be skilled in reading texts related to the field of expertise. Level:6,7</p> <p>4.to translate texts related to the field of expertise. Level:6,7</p> <p>5.ability to categorize the computing terminology in both English and Croatian. Level:6</p> <p>6.ability to give comments on various issues arising in the English of computing, both in English and in Croatian. Level:6</p> <p>7.ability to distinguish between the vocabulary and grammar structures in the English of computing and in standard English. Level:6</p> <p>8.ability to give comments on the quality of the English language on the Internet, especially of the content related to the field of expertise. Level:6</p> <p>9.ability to analyse online translators. Level:6</p> <p>10.ability to present in English the content related to computing . Level:6,7</p> <p>11.ability to devise dialogues related to the English of computing. Level:6,7</p> <p>12.to analyse various types of dictionary. Level:6</p> <p>13.to make a difference between the Croatian free word order and the English fixed word order. Level:6</p> <p>14.to generate sentences applying the sequence of tenses. Level:6,7</p> <p>15.to identify both regular and irregular forms of English plural. Level:6</p> <p>16.to analyse the English verb aspect. Level:6</p>				
Methods of carrying out lectures	Ex cathedra teaching Guest lecturer Case studies Demonstration Discussion Questions and answers Seminar, students presentation and discussion Homework presentation				
Methods of carrying out auditory exercises	Group problem solving Traditional literature analysis Data mining and knowledge discovery on the Web Essay writing Discussion, brainstorming Interactive problem solving Workshop				
Course content lectures	<p>1.English as a lingua franca, 2h, Learning outcomes:1</p> <p>2.English in IT and Computing, 2h, Learning outcomes:1,4,5</p> <p>3.Computing and IT terminology , 2h, Learning outcomes:4,5</p> <p>4.Croatian computing terminology, 2h, Learning outcomes:1,2,3,4,5,6</p> <p>5.English language on the Internet, 2h, Learning outcomes:1,4,5,6,7</p> <p>6.Machine translation, 2h, Learning outcomes:7,8,9</p> <p>7.Online Machine Translators, 2h, Learning outcomes:7,8,9</p> <p>8.Dictionary, 2h, Learning outcomes:3,12</p> <p>9.Learning foreign languages online, 2h, Learning outcomes:6</p> <p>10.Preliminary exam, 2h, Learning outcomes:1,2,3,5,6,7,8,9,10</p> <p>11.Direct/Indirect Speech, 2h, Learning outcomes:13</p> <p>12.Sequence of tenses, 2h, Learning outcomes:13,14</p> <p>13.Croatian and English noun plurals, 2h, Learning outcomes:15</p> <p>14.English verb tense aspect, 2h, Learning outcomes:16</p> <p>15.Preliminary exam, 2h, Learning outcomes:11,12,13,14,15,16</p>				
Course content auditory	<p>1.Computer applications; English verb tenses, 2h, Learning outcomes:2,4,7,10</p> <p>2.Types of computer; English verb tenses (exercises), 2h, Learning outcomes:2,4,6,10</p> <p>3.Input devices; Active voice/Passive voice, 2h, Learning outcomes:2,3,4,7,10</p> <p>4.Scanner; Active voice/Passive voice, 2h, Learning outcomes:2,3,4,6,10</p> <p>5.Output devices; Comparison of adjectives and adverbs, 2h, Learning outcomes:2,3,4,6,10</p> <p>6.Preliminary exam, 2h, Learning outcomes:2,3,4,7,10</p> <p>7.Data storage; Conditional clauses, 2h, Learning outcomes:2,4,10</p> <p>8.Magnetic data storage; Conditional clauses and sequence of tenses, 2h, Learning outcomes:2,3,10</p> <p>9.Optical storage; Modal verbs, 2h, Learning outcomes:2,3,4,7,10</p> <p>10.Flash memory; Modal verbs, 2h, Learning outcomes:2,3,4,10</p> <p>11.My ideal computer system; Direct/Indirect speech, 2h, Learning outcomes:2,3,4,6,10,13</p> <p>12.In a cybercafe; Sequence of tenses, 2h, Learning outcomes:1,2,6,13,14</p> <p>13.Buying a computer; Plural of nouns, 2h, Learning outcomes:2,3,10,15</p> <p>14.Mobile phones; English verb tense aspect, 2h, Learning outcomes:1,2,9,16</p>				

	15.Preliminary exam, 2h, Learning outcomes:2,3,4,7,10
Required materials	Basic: classroom, blackboard, chalk... Whiteboard with markers Overhead projector Video equipment Operating supplies
Exam literature	1. Professional English in Use ICT, for Computer and Internet, Esteras, Fabre, Cambridge University Press 2. materijali s predavanja (objavljeni na web stranicama kolegija) sastavljeni od tekstova preuzetih iz suvremene stručne i metodičke literature 3. Kiš, M. Englesko-hrvatski, hrvatsko-engleski školski informatički rječnik. Naklada Ljevak, Zagreb, 2003. 4. Stojaković, B. Skripta English for computer users I 5. Mihaljević, M. Hrvatsko računalno nazivlje, 1993
Students obligations	Regular attendance in both lectures and exercises (maximum of 3 absences from exercises are tolerated).
Knowledge evaluation during semester	2 preliminary exams in both lectures and exercises; homework
Knowledge evaluation after semester	Written and oral exam.
Student activities:	Aktivnost (Written exam) ECTS 3
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.
Proposal made by	Professor Biljana Stojaković, PhD

Code WEB/ISVU	23790/170068	ECTS	19.0	Academic year	2018/2019
Name	Final thesis				
Status	6th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course 6th semester - (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			15+225 (225+0+0+0) 330	
Teachers	Lectures:1. dr.sc. Željko Širanović prof.v.š.				
Course objectives	To teach students how to use the acquired knowledge in solving engineering tasks				
Learning outcomes:	1.ability to identify a problem or a development area related to a subject assigned or approved by a mentor. Level:6 2.ability to analyse the achievements in the area. Level:6 3.ability to analyse a problem or a development area. Level:6 4. ability to devise a solution to a problem. Level:6,7 5.ability to provide a practical solution to a problem. Level:6,7 6.ability to reach a conclusion about the reaches made and the possibility of generalisation of work . Level:6,7 7.ability to present one's work results. Level:6,7				
Methods of carrying out lectures	Simulations Modelling Questions and answers				
Methods of carrying out auditory exercises	Other				
Course content lectures	1.General purpose of the thesis, broader and a narrower scope of work, 2h, Learning outcomes:1,2,3,4,5,6,7 2.The structure of the final thesis: introduction, theoretical and practical, work results, conclusion, summary, 2h, Learning outcomes:1,2,3,4,5,6,7 3.Form thesis per chapter, guidance and reference to the literature, manufacture and labeling of graphical components (images, tables, diagrams, etc.), 2h, Learning outcomes:1,2,3,4,5,6 4.Defining the preparation and planning of the thesis, research relevant sources (literature), 2h, Learning outcomes:1,2,3,4,5,6,7 5.Development of materials for public presentation and preparation for a public presentation, 2h, Learning outcomes:1,2,3,4,5,6,7 6.Individual work with students (individual consultation by appointment), 2h 7.Individual work with students (individual consultation by appointment), 2h 8.Individualni rad sa studentima prema dogovoru, 2h 9.Individual work with students (individual consultation by appointment), 2h 10.Individual work with students (individual consultation by appointment), 2h 11.Individual work with students (individual consultation by appointment), 2h 12.Individual work with students (individual consultation by appointment), 2h 13.Individual work with students (individual consultation by appointment), 2h 14.Individual work with students (individual consultation by appointment), 2h 15.Individual work with students (individual consultation by appointment), 2h				
Course content auditory	1.The agreement with the mentor and define specific issues (engineering area and topic name) for the final work, 2h 2.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 3.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 4.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 5.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 6.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 7.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 8.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 9.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 10.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 11.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 12.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 13.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 14.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h 15.Student independently develops his/her theoretical and practical thesis (the guidance and supervision by a mentor), 2h				
Required materials	Overhead projector				

Exam literature	Konzultacije sa mentorom ovisn o području i temi rada
Students obligations	Regular class attendance 10% Made final project according to the instructions on the final paper 90% Signature "Applications for the evaluation and defense of final thesis" signed by the mentor
Knowledge evaluation during semester	Regular attendance of lectures and consultations 10% Made final project according to the instructions on the final paper 90%
Knowledge evaluation after semester	Regular attendance of lectures and consultations 10% Made final project according to the instructions on the final paper 90%
Student activities:	Aktivnost ECTS (Project) 19
Remark	This course can not be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Matematika II Students cannot enroll in this course unless they have passed Objektivno orijentirano programiranje Students cannot enroll in this course unless they have passed Uvod u web tehnologije Students cannot enroll in this course unless they have passed Kineziološka kultura II Students cannot enroll in this course unless they have passed Fizika Students cannot enroll in this course unless they have passed Osnove elektrotehnike i elektronike Students cannot enroll in this course unless they have passed Primjena računala Students cannot enroll in this course unless they have passed Programiranje Students cannot enroll in this course unless they have completed Seminar

Code WEB/ISVU	23559/156335	ECTS	4.0	Academic year	2018/2019
Name	Introduction to Artificial Intelligence				
Status	4th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (0+30+0+0) 60	
Teachers	Lectures:1. Dr. sc. Marko Horvat v. pred. Laboratory exercises:Dr. sc. Marko Horvat v. pred. Laboratory exercises: Tamara Ivelja mag. ing. geod. et. geoinf. Laboratory exercises: Domagoj Tuličić				
Course objectives	Review of artificial intelligence methods and procedures as well as different approaches in this area. Students will understand the advantages and disadvantages of different approaches and identify problems to properly apply various artificial intelligence methods. Students will gain hands-on experience in developing software solutions for various problems of artificial intelligence within actual applications, including knowledge representation, automated reasoning, problems optimization, image recognition and scene understanding.				
Learning outcomes:	1.ability to discern the basic concepts of artificial intelligence. Level:6 2.ability to discern symbolic, connectivistic and probabilistic approaches to artificial intelligence. Level:6 3.ability to solve simple logical problems by applying logic programming. Level:6 4.ability to solve simple logic problems using automatic reasoning procedures. Level:6 5.ability to design and develop a simple image recognition system for a particular application. Level:6 6.ability to compare different approaches to representation of crisp and fuzzy knowledge. Level:6,7 7.ability to compare applicability of certain approaches in artificial intelligence to a real problem. Level:7 8.ability to assess philosophical aspects of artificial intelligence. Level:7				
Methods of carrying out lectures	Ex cathedra teaching Guest lecturer Case studies Demonstration Modelling Discussion Questions and answers Seminar, students presentation and discussion Homework presentation				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Group problem solving Data mining and knowledge discovery on the Web Discussion, brainstorming				
Course content lectures	1.Overview of artificial intelligence areas. Historical development. Development trends and the latest trends. Relations with other areas. The concept of intelligence and the Turing Test., 2h, Learning outcomes:1 2.Solving problems by searching the state space. Search strategies., 2h, Learning outcomes:1,2 3.Symbolic logic. Logic programming. Proposition logic., 2h, Learning outcomes:1,2,3 4.First-order logic. Predicate calculus., 2h, Learning outcomes:1,2,3 5.Prolog computer language. SWI-Prolog., 2h, Learning outcomes:2,3 6.Advanced topics in Prolog. , 2h, Learning outcomes:3,4 7.Optimization problems. Evolutionary computing. Genetic algorithm., 2h, Learning outcomes:3,4 8.Uncertain knowledge and reasoning. Fuzzy logic and fuzzy reasoning., 2h, Learning outcomes:5 9.Knowledge models based on probability theory. Bayesian scheme., 2h, Learning outcomes:4,5 10.Computer vision. OpenCV framework., 2h, Learning outcomes:6 11.Machine learning. Supervised, unsupervised and reinforcement learning., 2h, Learning outcomes:6,7 12.Information retrieval. Text representation and categorization., 2h, Learning outcomes:6,7 13.Affective computing. Name	Introduction to Unix Systems				
Status	4th semester - Computer systems and network engineering (Izvanredni raarstva) - obligatory course 4th semester - (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (0+30+0+0) 60	
Teachers	Lectures:1. dr.sc.rač. Ivica Dodig , prof.v.š. Lectures:2. dr.sc.rač. Davor Cafuta , prof.v.šk. Laboratory exercises:dr.sc.rač. Davor Cafuta , prof.v.šk. Laboratory exercises: Andrej Vitez				
Course objectives	Enable students to practically resolve tasks in relation to office informatization on various operating systems.				
Learning outcomes:	1.ability to create files and directories on a UNIX server through a command line. Level:6,7 2.ability to generate summarized data through a command line on a UNIX server. Level:6,7 3.ability to rearrange files on a UNIX server to make the service run smoothly through a command line. Level:6,7 4.ability to create the permissions necessary to work with files and directories on UNIX through a command line. Level:6,7 5.ability to build a virtual UNIX based server. Level:6 6.ability to set the UNIX core in order to improve the hardware performance. Level:6,7 7.ability to design a network for a small-sized office with a UNIX based server . Level:6 8.ability to integrate the work of the Windows clients and of a UNIX server. Level:6,7 9.ability to create a service on a UNIX server to assign IP addresses to clients. Level:6 10.ability to test the functioning of a network in a small-sized office. Level:6 11.ability to combine the work of the Windows programs and of UNIX OS. Level:6,7				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Modelling Discussion Questions and answers				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Laboratory exercises, computer simulations				
Course content lectures	1.History and instalation of open source operating system, 2h, Learning outcomes:4 2.Basic commands in UNIX shell., 2h, Learning outcomes:1 3.Advanced usage of the UNIX shell., 2h, Learning outcomes:2,3 4.Specific UNIX commands., 2h, Learning outcomes:2,3 5.Multiuser administration., 2h, Learning outcomes:3,4 6.Permissions in open source operating systems., 2h, Learning outcomes:3,4 7.Command line text editors., 2h, Learning outcomes:2 8.Basic shell scripting., 2h, Learning outcomes:3 9.Organization of the operating system., 2h, Learning outcomes:6,11 10.Process management., 2h, Learning outcomes:6,11 11.Packet management., 2h, Learning outcomes:6,11 12.Kernel compiling, 2h, Learning outcomes:6,11 13.Network administartion and basic firewall options., 2h, Learning outcomes:7,8 14.DHCP service administration, 2h, Learning outcomes:9,10 15.Theoretical exam, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11				
Course content laboratory	1.-, 2h 2.Basic commands in UNIX shell., 2h, Learning outcomes:1 3.Advanced usage of the UNIX shell., 2h, Learning outcomes:2,3 4.Specific UNIX commands., 2h, Learning outcomes:2,3 5.Multiuser administration., 2h, Learning outcomes:3,4 6.Permissions in open source operating systems., 2h, Learning outcomes:3,4 7.Command line text editors., 2h, Learning outcomes:2 8.Basic shell scripting., 2h, Learning outcomes:3 9.-, 2h 10.Process management., 2h, Learning outcomes:7,11 11.Packet management., 2h, Learning outcomes:6,11 12.Kernel compiling, 2h, Learning outcomes:6,11 13.Network administartion and basic firewall options., 2h, Learning outcomes:7,8 14.DHCP service administration, 2h, Learning outcomes:9,10 15.Practical exam, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11

Course objectives	To introduce students to practical and theoretical aspects of using HTML and CSS, the basic markup languages for making the Web based content and layout. Students will learn how to design and code Web pages. The process of building a modern Web site will be presented (from buying a domain name to Web site finalization). [To successfully adopt the course material does not require prior knowledge of the Web development or Web building software.]				
Learning outcomes:	<ol style="list-style-type: none">1.ability to distinguish between different languages used for designing Web sites (HTML 4 and 5, CSS 2 and 3); to get familiar with the languages through their theoretical and practical usage, in the ability context of markup languages i upoznati ih kroz njihovu teoretsku i praktičnu dimenziju te u širem kontekstu jezika za obilježavanje (markup languages). Level:62.ability to write a code in (X)HTML and in CSS and design a Web page to meet the requests of the W3C validation, contemporary code presentation of characters, basic design, functionality and standards of a semantic Web. Level:6,73.ability to design a webpage and to arrange the code elements of a Web page using various techniques: tables, frames, margins, positioning, floating and grids.. Level:64.ability to understand why in certain cases one and the same code is shown differently in different browsers; to understand the way in which a browser displays a Web page; to understand how to avoid problems. Level:75.ability to compare different criteria which determine the quality of Web sites (benchmark and validation tests).. Level:6,76.ability to evaluate tools used for Web site design (browsers, plugins, code editors, office applications and packages, graphical user interfaces, etc.).. Level:77.ability to take a critical attitude towards technologies used in the Web site design (videocodecs, audiocodecs, open-source software or platform, the future of HTML and CSS, etc.) .. Level:78.ability to anticipate the direction of the development of the technology of data display on the Web using HTML5 and CSS3. . Level:6,79.identify future technologies on Web (operating systems on the Internet, a close connection between application software and Web sites, design with multi-resolution interfaces etc.. Level:610.ability to identify a need for general computer literacy.. Level:611.ability to identify inconsistency of contemporary web technologies and identify a need for continuous improvement.. Level:612.ability to give students directions on which knowledge sources to use (printed materials, Internet sources, tutorials, etc.).. Level:713.ability to plan one's own advancement in JavaScript, server-oriented programming languages and other technologies.. Level:6,714.suggest to plan business career by opening own startup company.. Level:6,715.ability to integrate more Web pages into Web site and connect them with absolute and relative links.. Level:6,716.ability to prepare and optimize images and photos for Web site; choose a suitable format.. Level:6,717.ability to formulate webpage key words and to set metadata.. Level:6,718.ability to design horizontal or vertical navigation bar, adjust it to a webpage content and ability to know how to code it.. Level:619.ability to create a Web page adapted to the needs of different browser width layout or media.. Level:6,720.ability to link multimedia elements into a Web page (audio, video, web mapping services).. Level:6,721.create visual effects for enriching user experience of web site. Level:6,7				
Involvement of learning outcomes of the course in study programme:	<ol style="list-style-type: none">1.1.OPČI Služiti se stranim jezikom u literaturi i svakodnevnoj stručnoj komunikaciji. : 2h in 150h1.2.OPČI Primijeniti znanje matematike i fizike na inženjerske probleme.: 3h in 150h1.3.OPČI Koristiti tehnike, vještine i suvremene alate neophodne za inženjersku praksu.: 3h in 150h1.4.OPČI Povezati inženjerske aktivnosti konstruiranja, proizvodnje i marketinga s potrebama korisnika proizvoda i usluge.: 5h in 150h1.5.OPČI Identificirati, modelirati i rješavati inženjerske probleme.: 2h in 150h2.1.OSOBNE Znanje o suvremenim pitanjima struke i društva.: 3h in 150h2.2.OSOBNE Odgovornost, dosljednost, točnost, ažurnost.: 10h in 150h2.3.OSOBNE Etički i moralni pristup radu.: 5h in 150h2.4.OSOBNE Kriička evaluacija argumenata, pretpostavki i podataka u cilju stvaranja mišljenja i pridonošenja rješenju problema.: 3h in 150h2.7.OSOBNE Predstavljanje informacija, ideja, problema i rješenja stručnoj i općoj publici.: 3h in 150h2.8.OSOBNE Komunikacijske vještine u okviru struke te s klijentima, na hrvatskom i engleskom jeziku.: 2h in 150h2.9.OSOBNE Profesionalna i ljudska osobnost.: 2h in 150h2.10.OSOBNE Prilagodljivost novim tehnologijama i tehnikama kao dio procesa cjeloživotnog učenja.: 5h in 150h2.11.OSOBNE Otvorenost za nova znanja, iskustva i kulturne okolnosti.: 4h in 150h2.12.OSOBNE Fleksibilnost i prilagodljivost u iznalaženju tehničkih rješenja uz neupitno poštivanje temeljnih etičkih načela, pravnih normi i pravila struke.: 4h in 150h3.2.RAC Identificirati, upravljati i ispravno koristit alate kao i sam koncept operacijskih sustava.: 40h in 150h4.3.IRSIM Korištenje razvojne okoline, propisane metodologije i tehnologija u izradi programa sukladno specifičnim zahtjevima okoline (HTML,CSS,ASP,MVC,JAVA,PHP) sa naglaskom na olakšavanje rada u okruženju računalnih sustava i mreža.: 2h in 150h4.5.IRSIM Sposobnost identificiranja, uspoređivanja i korištenja specifičnih zakonitosti iz specijaliziranih područja računarstva sa naglaskom na računalne sustave i mreže (kriptografija, ugrađeni sustavi, složene aplikacije, programski modeli, testiranje): 5h in 150h5.1.PRIN Primijeniti, razumijevati i koristiti napredna načela računalnih mreža sa naglaskom na razumijevanje načina				

	rada.: 2h in 150h 5.4.PRIN Sposobnost planiranja, procjenjivanja i osmišljavanja dizajna sučelja, programskih rješenja i mrežnih stranica: 40h in 150h 5.5.PRIN Sposobnost identificiranja, uspoređivanja i korištenja specifičnih zakonitosti iz specijaliziranih područja računarstva sa naglaskom na programerska rješenja (kriptografija, ugrađeni sustavi, složene aplikacije, programski modeli, testiranje): 5h in 150h
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations Discussion, brainstorming
Course content lectures	1.Motivational lecture and introduction to markup languages. Future of web. Internet startups., 2h, Learning outcomes:1,9,10,11,12,13,14,15 2.Web development and markup languages. Validation. Webpage development fundamentals. Webpage design technologies. Basic syntax. Absolute and relative links. Downloads., 2h, Learning outcomes:4,5,6,7,8,9,15 3.Basic web statistical indicators. Header and metadata. Strict, transitional and frame work modes. End of line. Byte-order mark (BOM). Work with images. Text image layout. External links (anchors). Frames. Favicons. Paragraphs. Lists., 2h, Learning outcomes:5,6 4.Character representation and characters support for Croatian. Redirections. IFrames. Anchorage in different frames. Tables and their modifications. HTML forms., 2h, Learning outcomes:6,9,15 5.Features of semantic Web, content and layout aspects. Introduction to CSS. Position of a code in CSS and the relation to HTML. Classes. Identifiers. Background, text, font, link and list selectors. Rising and falling line., 2h, Learning outcomes:7,8,12 6.Box model. Block and inline elements. div and span. Cursors. Borders, margins, paddings. CSS Media Types. CSS priorities. Webpage quality benchmarks: ACID, Pingdom, W3 Validator, Nibbler, GTmetrix. Nonbreaking space. Browsers., 2h, Learning outcomes:5,6,7,12 7.CSS units and measures. Dimensioning. Klassification. Relative, absolute and fixed positioning. Conditional comments for Internet Explorer., 2h, Learning outcomes:1,4 8.Webpage elements composition and structure. Basic design. Horizontal and vertical navigation bar coding. Link stylization and roll-over menu effects., 2h, Learning outcomes:3,4,12 9.Floating - basic and advanced aspects., 2h, Learning outcomes:2,3,7 10.Responsive web design technology (RWD). Pseudoclasses and i pseudoelements. Lorem ipsum., 2h, Learning outcomes:2,3,8,9 11.Navigation bar using images and image sprites. Corner rounding. Shadows. Code and image optimization. Selector combination. Centering. URI., 2h, Learning outcomes:1,2,3,12 12.Introduction to HTML5, browser support and future of web structure coding. Videocodecs and videoformats. Audiocodecs and audioformats. Flash to HTML5 conversion. Inserting video, audio and geolocation frames., 2h, Learning outcomes:1,4,6,7,8,9,12 13.Introduction to CSS3, browser support and future of web design coding. Browser prefixes. Shadowing, corner rounding, transparency, text effects, gradience. CSS3 navigation bar development., 2h, Learning outcomes:1,3,5,6,7,8,9,12 14.Grid positioning. Webpage validations. Modernizr. Web fonts and formats. Technologies for further study (JavaScript, Dart, Spark, server-oriented programming languages, SEO)., 2h, Learning outcomes:3,9,12,13 15.Final exam preparation., 2h
Course content laboratory	1.no class, 2h 2.First HTML code writing. Exercise related to relative and absolute links, character representation and metadata., 2h, Learning outcomes:2,3,6,16 3.Exercise related to external links (anchors) and frames. Work with pictures and favicons. Text markup., 2h, Learning outcomes:2,3,17 4.Exercise related to tables, HTML forms and DOCTYPE., 2h, Learning outcomes:2,3,18 5.First CSS code writing. CSS and HTML linking. CSS markup of background, text, font, links and lists. Building a CSS selectors e-textbook., 2h, Learning outcomes:2,3 6.Exercise related to negative margins positioning. Gradient picture generation., 2h, Learning outcomes:2,3,17 7.Exercise related to relative and absolute positioning., 2h, Learning outcomes:2,3 8.Exercise related to horizontal and vertical navigation with text hover effect., 2h, Learning outcomes:2,3,19 9.Exercise related to floating elements positioning. , 2h, Learning outcomes:2,3 10.Exercise related to responsive webpage design (RWD) depending on webpage width and media., 2h, Learning outcomes:2,3,19 11.Exercise related to making navigation bar with images and image sprites., 2h, Learning outcomes:2,19 12.Exercise related to complete webpage designing, coding and development., 2h, Learning outcomes:2,3 13.Exercise related to making picture shadows and transparency, rounded corners, text effects and inserting YouTube, Google Maps and audio frames., 2h, Learning outcomes:2,3,20 14.Exercise related to grid layout, webpage validation, using browser development tools Mozilla Firebug and Chrome Inspect Elements., 2h, Learning outcomes:2,6,9 15.Final exam preparation., 2h
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector Special equipment
Exam literature	Basic literature: 1. Prezentacijska skripta s predavanja objavljena na stranicama kolegija. 2. Poglavlja W3Schoolsa s e-tutorijalima o HTML-u, XHTML-u i CSS-u (http://www.w3schools.com/).

	<p>3. Recenzirana skripta iz kolegija. 4. M. MacDonald, HTML5 - The Missing Manual, O'Reilly, 2014. 5. D.S.McFarland, CSS3 - The Missing Manual, O'Reilly, 2013.</p> <p>(eng:Lecture presentation notes (PDF) downloadable on course webpage. W3Schools e-tutorial chapters about HTML, XHTML and CSS (http://www.w3schools.com/). Reviewed course textbook.</p>		
Students obligations	<p>Done laboratories, collected 18 points from 28 possible during the exercises. - 12 exercises * 2 points - 2 short test * 2 points</p>		
Knowledge evaluation during semester	<p>40% of the grade is lab (evaluation form of points collected during the exercises) 30% score is first mid-term exam, 30% score is first mid-term exam.</p>		
Knowledge evaluation after semester	<p>Lab exercises carries 40% marks. Written exam carries 60% marks.</p>		
Student activities:	<table><tr><td>Aktivnost (Written exam)</td><td>ECTS 5</td></tr></table>	Aktivnost (Written exam)	ECTS 5
Aktivnost (Written exam)	ECTS 5		
Remark	<p>This course can be used for final thesis theme</p>		
Prerequisites:	<p>No prerequisites.</p>		
Proposal made by	<p>Sanja Duk, dipl. ing., 20.5.2016.</p>

Course objectives	To introduce students to Java; to enable students to acquire the principles and techniques of advanced Java programming; to qualify students to develop an application with a GUI and a database integrated				
Learning outcomes:	<ol style="list-style-type: none"> 1.ability to write a code of an application containing a GUI, business logic and a database. Level:6,7 2.ability to organise a program code into classes and interfaces according to the principles of OOP. Level:6,7 3.ability to design an application which is easily upgradable and adjusted to easy maintenance. Level:6 4.ability to solve various types of practical problems by using the Java FX applications. Level:6 5.ability to design a Java FX application, from a database to a GUI. Level:6 6.ability to give comments on the Java code by means of Javadoc documentation. Level:6 7.ability to plan the upgrade of Java FX applications by achieving new functionality and new modules. Level:6,7 8.ability to relate the knowledge gained in using other programming languages to Java. Level:6,7 9.ability to analyse the users' requests for application functionality. Level:6 10.ability to test the proper operation of an application during its 'life'. Level:6 11.ability to develop a Java FX application by using open source tools and libraries. Level:6,7 12.ability to organise a development environment Eclipse for an efficient development of Java FXApplications. Level:6,7 13.choose advanced language features for solving common problems. Level:7 				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Interactive lectures with lots of practical examples. The adoption of practical knowledge and techniques used in complex projects. Independently planning and implementation of a Java application with a graphical interface and database. Documentation of ready-made solutions with Javadoc documentation.				
Methods of carrying out auditory exercises	Group problem solving Computer simulations

Grundkurs Programieren iz Java, Hanser, 6. Auflage, 2011.
Students obligations	Solving ten laboratory exercises.
Knowledge evaluation during semester	Ten laboratory exams - 6 points each Two partial exams - 10 points each Final exam - 20 points Optional points for additional effort Every partial exam has a correctional exam Maximum 100 points 0-49 - not good enough 50-61 - sufficient 62-74 - good 75-86 - very good 87-100 - excellent
Knowledge evaluation after semester	Written exam is evaluated with 40 points, and remaining 60 points are transferred from the achievement on laboratory exams during the semester time.
Student activities:	Aktivnost ECTS (Practical work) 4 (Written exam) 1
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Programiranje
Proposal made by	Aleksander Radovan, BSc. engineer, senior lecturer, 03.06.2018.

Code WEB/ISVU	23229/143140	ECTS	1.0	Academic year	2018/2019
Name	Kinesiology Education I				
Status	1st semester - Undergraduate professional study in computing (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home				0+30 (30+0+0+0) 0
Teachers	Auditory exercises:1. Marko Milanović				
Course objectives	To develop in students the habit of practising sports and improving their psychophysical condition and conduct				
Learning outcomes:	1.ability to demonstrate how to perform properly technical elements of certain sports. Level: 2.ability to explain the basic terms related to certain sports. Level: 3.ability to explain the basic rules of certain sports. Level: 4.ability to recognize the muscle building exercises. Level: 5.ability to explain the importance of warming up and stretching. Level: 6.ability to describe the organisation of sport competitions. Level: 7.ability to understand the importance of daily workout throughout one's life. Level:				
Involvement of learning outcomes of the course in study programme:	2.1.OSOBNE Znanje o suvremenim pitanjima struke i društva.: 5h in 30h 2.2.OSOBNE Odgovornost, dosljednost, točnost, ažurnost.: 10h in 30h 2.3.OSOBNE Etički i moralni pristup radu.: 10h in 30h 2.4.OSOBNE Kritička evaluacija argumenata, pretpostavki i podataka u cilju stvaranja mišljenja i pridonosenja rješenju problema.: 5h in 30h 2.5.OSOBNE Spremnost za rad na terenu i u nestandardnim uvjetima.: 5h in 30h 2.9.OSOBNE Profesionalna i ljudska osobnost.: 20h in 30h 2.11.OSOBNE Otvorenost za nova znanja, iskustva i kulturne okolnosti.: 10h in 30h				
Methods of carrying out auditory exercises	Other

Course content lectures	<p>1.Complex numbers, algebraic and trigonometric form, basic arithmetic operations with complex numbers (addition, subtraction, multiplication, division, raising to an integer power, and taking roots (fractional power)), Gauss plane, 2h, Learning outcomes:1,2</p> <p>2.Determinant (2nd order - by formula, 3rd order - by rule of Sarrus and Laplaces expansion, 4th order - by Laplaces expansion nad using elementary transformations), 2h, Learning outcomes:3,5</p> <p>3.System of linear equations, solving by Cramers rule and by Gauss-Jordan elimination method , 2h, Learning outcomes:5</p> <p>4.Vectors, 2h, Learning outcomes:4,5</p> <p>5.Functions, definition, domain, range, codomain, injection, surjection, bijection, graph, increasing and decreasing functions, monotonicity, composition, inverse, even and odd functions, 2h, Learning outcomes:6,7</p> <p>6.Elementary functions: power functions, polynomials, exponential functions, logarithmic functions, trigonometric functions, hyperbolic functions, 2h, Learning outcomes:6,7,8</p> <p>7.1. exam, 2h, Learning outcomes:1,2,3,4,5,6,7,8</p> <p>8.Limit, sequence, 2h, Learning outcomes:10</p> <p>9.Sketching graphs of some functions (polynomials, trigonometric functions), 2h, Learning outcomes:9</p> <p>10.Problem of finding a tangent, derivative of function, rules for derivative of a sum, product and quotient of two functions, 2h, Learning outcomes:9,12</p> <p>11.Differential, implicit differentiation, parametric differentiation, 2h, Learning outcomes:10,11</p> <p>12.Derivative of composite function, derivative of function $f(x)=x^x$, 2h, Learning outcomes:11</p> <p>13.LHopitals rule, 2h, Learning outcomes:11</p> <p>14.Taylor polinomial of a function centered at zero, 2h, Learning outcomes:11</p> <p>15.2. exam, 2h, Learning outcomes:9,10,11,12</p>				
Course content auditory	<p>1.Complex numbers, algebraic and trigonometric form, basic arithmetic operations with complex numbers (addition, subtraction, multiplication, division, raising to an integer power, and taking roots (fractional power)), Gauss plane, 3h, Learning outcomes:1,2</p> <p>2.Determinant (2nd order - by formula, 3rd order - by rule of Sarrus and Laplaces expansion, 4th order - by Laplaces expansion and using elementary transformations), 3h, Learning outcomes:3,5</p> <p>3.System of linear equations, solving by Cramers rule and by Gauss-Jordan elimination method , 3h, Learning outcomes:6</p> <p>4.Vectors, 3h, Learning outcomes:4,5</p> <p>5.Functions, definition, domain, range, codomain, injection, surjection, bijection, graph, increasing and decreasing functions, monotonicity, composition, inverse, even and odd functions, 3h, Learning outcomes:6,7</p> <p>6.Elementary functions: power functions, polynomials, exponential functions, logarithmic functions, trigonometric functions, hyperbolic functions, 3h, Learning outcomes:6,7,8</p> <p>7.1. exam, 3h, Learning outcomes:1,2,3,4,5,6,7,8</p> <p>8.Limit, sequence, 3h, Learning outcomes:10</p> <p>9.Sketching graphs of some functions (polynomials, trigonometric functions), 3h, Learning outcomes:9</p> <p>10.Problem of finding a tangent, derivative of function, rules for derivative of a sum, product and quotient of two functions, 3h, Learning outcomes:9,12</p> <p>11.Differential, implicit differentiation, parametric differentiation, 3h, Learning outcomes:10,11</p> <p>12.Derivative of composite function, derivative of function $f(x)=x^x$, 3h, Learning outcomes:11</p> <p>13.LHopitals rule, 3h, Learning outcomes:11</p>				

	14. Taylor polynomial of a function centered at zero, 3h, Learning outcomes: 11 15.2. exam, 3h, Learning outcomes: 9, 10, 11, 12
Required materials	Basic: classroom, blackboard, chalk... Whiteboard with markers Special equipment Some of the problems are solved using the appropriate software Mathematica.
Exam literature	Basic literature: 1. P. Javor: Uvod u matematičku analizu, Školska knjiga, Zagreb, 1983. 2. S. Suljagić: Matematika I, skripta, Zagreb, 2005 3. I. Slapničar: Matematika 1, skripta, Split, 2002. 4. B. P. Deminović: Zadaci i rješeni primjeri iz više matematike, Danjar, Zagreb, 1995. 5. N. Elezović: Linearna algebra, Element, Zagreb, 1995. Additional literature: 1. L. Krnić, Z. Šikić: Račun diferencijalni i integralni, I dio, Školska knjiga, Zagreb, 1992. 2. V. Devide: Riješeni zadaci iz više matematike, svezak I i II, Školska knjiga, Zagreb, 1985. 3. T. Bradić, R. Roki, J. Pečarić, M. Strunje: Matematika za tehničke fakultete, Multigraf, Zagreb, 1994.
Students obligations	No special requirements
Knowledge evaluation during semester	Two exams during semester Ratings by the outcome: maximum 100 points 50-62 sufficient (2) 63-75 good (3) 76-88 very good (4) 89-100 excellent (5)
Knowledge evaluation after semester	Written exam 60% of mark Ratings of written part of the exam: maximum 100 points 50-62 sufficient (2) 63-75 good (3) 76-88 very good (4) 89-100 excellent (5) Oral exam 40% of mark
Student activities:	Aktivnost ECTS (Written exam) 7
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.
Proposal made by	dipl.ing.mat Tihana Strmečki., 19.05.2016.

Code WEB/ISVU	23233/143155	ECTS	7.0	Academic year	2018/2019
Name	Mathematics II				
Status	2nd semester - Undergraduate professional study in computing (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+45 (45+0+0+0) 135	
Teachers	Lectures:1. Tihana Strmečki Auditory exercises: Andrea Katarčić Auditory exercises: Tihana Strmečki				
Course objectives	To enable students to solve mathematical problems related to engineering practice.				
Learning outcomes:	1.ability to calculate primitive functions - indefinite integrals . Level:6 2.ability to calculate definite integrals. Level:6 3.ability to calculate improper integrals. Level:6 4.ability to calculate integrals by using numerical methods. Level:6 5.ability to solve basic types of differential equations. Level:6 6.ability to solve differential equations by using Laplace transformation. Level:6 7.ability to solve differential equations by using numerical methods . Level:6				
Methods of carrying out lectures	Ex cathedra teaching Case studies Discussion Questions and answers Other The chalkboard lectures include theory and many examples clearly analyzed step by step, in cooperation with students.				
Methods of carrying out auditory exercises	Group problem solving Discussion, brainstorming Other Exercises are solved on the blackboard in cooperation with students.				
Course content lectures	1.Indefinite integrals, primitive function, basic integrals, 2h, Learning outcomes:1 2.Solving indefinite integrals by substitution and using partial fractions, 2h, Learning outcomes:1 3.Solving indefinite integrals by integration by parts, by completing the square of second degree trinomial, 2h, Learning outcomes:1 4.Definite integrals, Newton-Leibniz formula, Mid value theorem for integrals, 2h, Learning outcomes:1,2 5.Improper integrals, trigonometry and hyperbolic substitutions, 2h, Learning outcomes:1,2 6.Application of definite integrals: areas of plane figures, the arc length of a curve, volumes of solids and areas of surfaces of revolution, 2h, Learning outcomes:1,2,3 7.Numerical methods of calculating definite integrals, 2h, Learning outcomes:1,2,3,4 8.1. exam, 2h, Learning outcomes:1,2,3 9.Ordinary differential equations - introduction, 2h, Learning outcomes:5 10.First order ODE with separable variables, homogenous ODEs, 2h, Learning outcomes:5 11.Solving ODEs by variable substitution (homogeneous diff. eqs., ode of form $y=f(ax+by+c)$), 2h, Learning outcomes:5 12.Linear ODEs, homogenous and nonhomogenous, variation of constant method, integrating factor method, 2h, Learning outcomes:5 13.Linear ODEs of second order with constant coefficients, homogenous and nonhomogenous, 2h, Learning outcomes:5 14.Solving ODEs by Laplaces transformation; Numerical methods of solving ODEs, 2h, Learning outcomes:5,6,7 15.2. exam, 2h, Learning outcomes:5,6,7				
Course content auditory	1.Indefinite integrals, primitive function, basic integrals, 3h, Learning outcomes:1 2.Solving indefinite integrals by substitution, and using partial fractions, 3h, Learning outcomes:1 3.Solving indefinite integrals by integration by parts, by completing the square of second degree trinomial, 3h, Learning outcomes:1 4.Definite integrals, Newton-Leibniz formula, 3h, Learning outcomes:1,2 5.Improper integrals, trigonometry and hyperbolic substitutions, 3h, Learning outcomes:1,2 6.Application of definite integrals: the areas of plane figures, the arc length of a curve, volumes of solids and areas of surfaces of revolution, 3h, Learning outcomes:1,2,3 7.Numerical methods of calculating definite integrals, 3h, Learning outcomes:1,2,3,4 8.1. exam, 3h, Learning outcomes:1,2,3,4 9.Ordinary differential equations - introduction, 3h, Learning outcomes:5 10.First order ODE with separable variables, 3h, Learning outcomes:5 11.Solving ODEs by variable substitution (homogeneous diff. eqs., ode of form $y=f(ax+by+c)$), 3h, Learning outcomes:5 12.Linear ODEs, homogenous and nonhomogenous, variation of constant method, integrating factor method, 3h, Learning outcomes:5 13.Linear ODEs of second order with constant coefficients, homogenous and nonhomogenous, 3h, Learning outcomes:5 14.Solving ODEs by Laplaces transformation; Numerical methods of solving ODEs, 3h, Learning outcomes:6,7 15.2. exam, 3h, Learning outcomes:5,6,7

Course objectives	The course teaches the principles of object-oriented programming and design, allowing students to master the C++ programming language and to work with rapid application development (RAD) tools. Object-oriented design based on the development of the object model of the domain is presented. The acquisition of knowledge and skills to successfully solve real-world computing problems at higher academic study levels.				
Learning outcomes:	1. ability to identify fundamental differences between procedural and object-oriented paradigm and understand the basic features of objects. Level:6 2.ability to to form a class based on the definition of the properties and behavior of the object. Level:6 3.ability to give a software solution in C++ by means of classes and by using a paradigm developed by OOP. Level:6 4.ability to devise operators in C++ based classes. Level:6,7 5.ability to design an OOP based solution by using templates from STL C++ libraries. Level:6 6.ability to create one's own class and function templates in solving OOP based problems. Level:6,7 7.ability to distinguish between OOP languages (C++, C#, Java). Level:6 8.ability to relate the knowledge gained in basic OO paradigms to different solutions to API classes in C++ for developing a GUI. Level:6,7				
Methods of carrying out lectures	Ex cathedra teaching Case studies Discussion				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment				
Course content lectures	1.Introductory lecture., 2h, Learning outcomes:1 2.History and concept of the OO paradigm. C++ as opposed to C. Advantages of the OO paradigm., 2h, Learning outcomes:1 3.Object, object model, properties and behavior of objects , 2h, Learning outcomes:1 4.Classes, instances, access permission, public interface., 2h, Learning outcomes:1,2 5.Constructor, destructor, functions, function overload.Static and dynamic object instances (new and delete operators)., 2h, Learning outcomes:2,3,7 6.Copying of objects, copy constructor, associating objects., 2h, Learning outcomes:2,3,7 7.Constant members and objects. References. Friend functions., 2h, Learning outcomes:2,3,7 8.Operators overloading., 2h, Learning outcomes:3,4,7 9.Inheritance, deklaration, implementation of classes, the rights issued by inheritance., 2h, Learning outcomes:3,4,7 10.Access to functions, ancestors, overload. Rules for the constructor in a class., 2h, Learning outcomes:3,4,7 11.Polymorphism., 2h, Learning outcomes:3,4,7 12.Virtual member functions, virtual classes., 2h, Learning outcomes:3,4 13.Function templates and class templates., 2h, Learning outcomes:3,6,7 14.Use of the STL library. Use of templates., 2h, Learning outcomes:3,5,6,7 15.Solving exceptions. Editing a named space. Creating a project using MFC classes., 2h, Learning outcomes:3,4,5,6,7,8				
Course content laboratory	1.Preparation exercise for introduction to C++ and specific features I/O access., 2h, Learning outcomes:1 2.Introduction to work on exercises using Moodle and other LMS tool., 2h, Learning outcomes:1 3.Exercise 1: Object classes, attributes., 2h, Learning outcomes:1,2 4.Exercise 2: Methods, constructor, destructor., 2h, Learning outcomes:1,2 5.Exercise 3: Access modifiers, types of functions, passing arguments to the function., 2h, Learning outcomes:1,2 6.Exercise 4: Copy constructor, assignment operator., 2h, Learning outcomes:1,2,7 7.Exercise 5: Friend functions, const. restrictions., 2h, Learning outcomes:1,2,7 8.The first mid-term exam., 2h, Learning outcomes:1,2 9.Exercise 6: Operator overloading., 2h, Learning outcomes:2,3,4 10.Exercise 7: Inheritance., 2h, Learning outcomes:3,4,7 11.Exercise 8: Polymorphism., 2h, Learning outcomes:4,5,7 12.Exercise 9: Templates. Using STL., 2h, Learning outcomes:4,5,6,7 13.Exercise 10: Namespace, exception., 2h, Learning outcomes:3,4,5,6,7 14.Preparation for second mid-term., 2h, Learning outcomes:1,2,3,4,5,6,7,8 15.The second mid-term., 2h, Learning outcomes:1,2,3,4,5,6,7,8				
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector

Course objectives	To qualify students to build a fast prototype of an embedded system				
Learning outcomes:	1.to formulate the purpose and possibilities of using embedded systems . Level:6,7 2.to design an embedded system and formalise the needs for it, depending on a task . Level:6 3.to analyse a methodology used in the design of an embedded system. Level:6 4.to design the hardware section of an embedded system. Level:6,7 5.to develop a prototype of an embedded system in both the hardware and software sections. Level:6,7 6.to integrate the sensors and environment necessary for the proper operation of an embedded . Level:6,7 7.to test the proper operation of an embedded system. Level:6 8.to generalise the possibility of a design for the entire production. Level:6,7 9.to write proper documentation of the solution. Level:6,7				
Methods of carrying out lectures	Case studies Demonstration Simulations				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Other Specific equipment				
Course content lectures	1.Bools algebra, 1h, Learning outcomes:1 2.Microcontrollers, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 3.Input/output device, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 4.Display, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 5.Complex input/output solutions, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 6.Analog inputs, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 7.Partial exam, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 8.I2C, OneWire interface, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 9.RTC-Real time clock, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 10.Sensors: distance, light, IR, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 11.Sensors: temeprature, virbration, water level, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 12.Sensors: gyroscope, PIR, receiver/tranceiver, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 13.Output devices: relay, motor, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 14.SPI interface, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9 15.Final exam, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9				
Course content laboratory	1.No exercises 2.Simple program, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 3.LED, Joystick, Capacitive touch, keyboard, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 4.Display, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 5.Complex program, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 6.Linear potenciometer, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 7.No exercises 8.Temperature sensor., 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 9.RTC, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 10.Sensors, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 11.Sensors, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 12.Sensors, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 13.Relay, MOC, Motor, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 14.RFID SPI, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9 15.No exercises				
Required materials	Basic: classroom, blackboard, chalk... Special purpose laboratory General purpose computer laboratory Operating supplies				
Exam literature	1. http://arduino.cc 2. Morgolis M., Arduino Cookbook 2nd edition, O'Reilly media,2011.				
Students obligations	maximum of 2 absences from exercises.				
Knowledge evaluation during semester	Partial and final practical exam.				
Knowledge evaluation after semester	Final practical exam and oral exam.				

Student activities:	Aktivnost (Written exam)	ECTS 5
Remark	This course can be used for final thesis theme	
Prerequisites:	Students cannot enroll in this course unless they have passed Osnove elektrotehnike i elektronike Students cannot enroll in this course unless they have passed Programiranje Students cannot enroll in this course unless they have passed Operacijski sustavi	
Proposal made by	v.pred. Davor Cafuta ,dipl.ing.rač. v.pred. Ivica Dodig ,dipl.ing.rač, 10.01.2014	

Code WEB/ISVU	23551/156327	ECTS	6.0	Academic year	2018/2019
Name	Operating Systems				
Status	3rd semester - Computer systems and network engineering (Izvanredni raarstva) - obligatory course 3rd semester - (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (0+30+0+0) 120	
Teachers	Lectures:1. dr.sc.rač. Davor Cafuta , prof.v.šk. Lectures:2. dr.sc.rač. Ivica Dodig , prof.v.š. Laboratory exercises:1. dr.sc.rač. Davor Cafuta , prof.v.šk. Laboratory exercises:2. dr.sc.rač. Ivica Dodig , prof.v.š.				
Course objectives	Understand and learn how to use the functionality of a modern operating system.				
Learning outcomes:	1.ability to extract the basic elements of a computer in FN model. Level:6 2.ability to distinguish between a subprogram and a basic program, their functions as well. Level:6 3.ability to analyse the interruptions and interruptions routines; to distinguish between interruptions and exceptions. Level:6 4.ability to categorize the conditions of certain processes and their implementation. Level:6 5.ability to distinguish between a thread and a process, their advantages and disadvantages as well. Level:6 6.ability to write a program which solves the problem of one or more threads. Level:6,7 7.ability to compare the forced and unforced algorithms to organise the work of a processor. Level:6,7 8.ability to distinguish between different algorithms for loading auxiliary memory. Level:6 9.ability to calculate the size of a disk by means of basic parameters and compare the strategies of positioning the disk head. Level:6 10.ability to check which RAID field is used in assembling disks. Level:6 11.ability to analyse security aspects of the computer system. Level:6 12.ability to identify scheduling algorithms in multimedia system. Level:6				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Simulations Discussion Questions and answers				
Methods of carrying out laboratory exercises	Group problem solving Computer simulations				
Course content lectures	1.Operating system components , 2h, Learning outcomes:1 2.Input/output operations, 2h, Learning outcomes:1,2 3.Interrupt handling , 2h, Learning outcomes:1,3 4.Task, process and thread. Synchronisation ., 2h, Learning outcomes:1,2,4,5 5.Mutual exclusion in single and multiprocessor systems., 2h, Learning outcomes:4,5,6 6.Job scheduling, 2h, Learning outcomes:4,5,7 7.Operating system kernel. Semaphores. Producer and consumer problem. Deadlock., 2h, Learning outcomes:4,5,7 8.Partial exam., 2h, Learning outcomes:1,2,3,4,5,6,7 9.Paging., 2h, Learning outcomes:8 10.File system., 2h, Learning outcomes:8,9,10 11.Multimedia in operating system., 2h, Learning outcomes:12 12.Security., 2h, Learning outcomes:11 13.Multiprocessor system., 2h, Learning outcomes:1,4,5 14.Virtualization., 2h, Learning outcomes:1,11 15.Final exam, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12

Name	Physics				
Status	1st semester - Undergraduate professional study in computing (Izvanredni raarstva) - obligatory course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			45+30 (30+0+0+0) 135	
Teachers	Lectures:1. Alemka Knapp Lectures:2. prof.vis.šk. Ivica Levanat Auditory exercises: Alemka Knapp Auditory exercises: Diana Šaponja-Milutinović dipl.ing.fizike, pred.				
Course objectives	To introduce students to phenomena in Physics and values that can be used in the study programme in computing, in a broader sense of the laws of Physics				
Learning outcomes:	1.ability to make simple calculations of linear motions, motions on a circle, and a launch at an angle. Level:6 2.ability to analyse kinematic values of motions on a curve. Level:6 3.ability to calculate the translation acceleration of a body upon which a force is exerted; to calculate simple examples of angle acceleration . Level:6 4.ability to relate the work of forces to kinetic and potential energy of a body. Level:6,7 5.ability to distinguish between a classical mechanical description of motion and special relativity. Level:6 6.ability to analyse harmonic oscillation without damping. Level:6 7.ability to distinguish between basic thermodynamic values; to distinguish between different mechanisms of heat transfer. Level:6 8.ability to relate Bohr's model of atom to a quality description of electron shells and ribbons. Level:6,7 9.ability to make simple calculations of emission/absorption of photons and photoelectric effect. Level:6 10.ability to relate the knowledge about the design of an atomic core containing radioactive features. Level:6,7				
Involvement of learning outcomes of the course in study programme:	1.2.OPČI Primijeniti znanje matematike i fizike na inženjerske probleme.: 60h in 210h 1.5.OPČI Identificirati, modelirati i rješavati inženjerske probleme.: 20h in 210h 2.4.OSOBNE Kritička evaluacija argumenata, pretpostavki i podataka u cilju stvaranja mišljenja i pridonošenja rješenju problema.: 20h in 210h				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Discussion Questions and answers Other Oral presentation, including communication with students; their active participation is stimulated during formulation and analysis of physical laws. Physical phenomena and laws are illustrated by familiar examples or improvised demonstrations, and by simple experiments where possible. Equations and their derivations are fully outlined on the blackboard, illustrated by sketches and diagrams as appropriate.				
Methods of carrying out auditory exercises	Group problem solving Discussion, brainstorming Interactive problem solving Other Solving simpler problems in the topics covered by the lectures, in order to increase understanding of physical quantities and their interrelations. Calculations include numerical values which appear in technical applications. Teacher explains and illustrates the procedure, students solve the problems on the blackboard and in their notebooks.				
Course content lectures	1.Physical quantities and units., 2h, Learning outcomes:1,2 Polynomial derivative., 1h, Learning outcomes:1,2 2.Polynomial integration, definite integral., 1h, Learning outcomes:1,2 Rectilinear motion, free fall., 2h, Learning outcomes:1 3.Motion along curve and circle., 3h, Learning outcomes:1,2 4.Newton axioms, momentum, 3h, Learning outcomes:3 5.Work, power and energy., 3h, Learning outcomes:4 6.Rigid body rotation., 3h, Learning outcomes:2,3 7.Motion in gravitational field., 3h, Learning outcomes:5 8.Relativity of motion, inertial forces., 2h, Learning outcomes:6 The absolute and greatest speed c., 1h, Learning outcomes:6 9.Einstein special theory of relativity., 3h, Learning outcomes:6 10.Harmonic oscillations., 3h, Learning outcomes:7 11. Wave optics, photoelectric effect., 3h, Learning outcomes:8,9 12.Atomic structure, wave properties of particles., 3h, Learning outcomes:8,9 13.Electron shells., 1h, Learning outcomes:8 Semiconductors., 2h, Learning outcomes:8 14.Elementary particles, nuclear structure., 2h, Learning outcomes:10 Unstable nuclei., 1h, Learning outcomes:10 15.Radioactive decay, nuclear energy., 3h, Learning outcomes:10				
Course content auditory	1.Rectilinear motion., 2h, Learning outcomes:1 2.Rectilinear motion., 2h, Learning outcomes:1 3.Projectile motion., 2h, Learning outcomes:1,2 4.Circular motion., 2h, Learning outcomes:1,2 5.Newton axioms., 2h, Learning outcomes:3 6.Newton axioms., 2h, Learning outcomes:3 7.Work and power, energy., 2h, Learning outcomes:4 8.Collisions., 2h, Learning outcomes:4 9.1. partial exam, 2h, Learning outcomes:1,2,3,4 10.Rigid body rotation., 2h, Learning outcomes:2,3 11.Motion in gravitational field., 2h, Learning outcomes:5				

	12.Special theory of relativity., 2h, Learning outcomes:6 13.Bohr model of atom., 2h, Learning outcomes:8 14.Photoelectric effect., 1h, Learning outcomes:9 Radioactivity., 1h, Learning outcomes:10 15.2. partial exam, 2h, Learning outcomes:5,6,7,8,9						
Required materials	Basic: classroom, blackboard, chalk... Whiteboard with markers Overhead projector						
Exam literature	Basic literature: 1. Levanat, I., Fizika za TVZ: Kinematika i dinamika, TVZ, Zagreb, 2010; Additional literature: 1. Young and Freedman, University Physics, Addison Wesley, San Francisco, 2007; 2. Kulišić, P., Mehanika i toplina, Školska knjiga, Zagreb, 2005						
Students obligations	none						
Knowledge evaluation during semester	Two partial exams, each with numerical problems and theoretical questions. Minimum to pass each partial exam: theory 40%, problems 50%. For attending lectures up to 10% of theory maximum added.						
Knowledge evaluation after semester	Full exam, with numerical problems and theoretical questions. Minimum to pass: 40% problems and 40% theory.

Teachers	Lectures:1. dr.sc. Igor Urbiha prof.vis.šk. Auditory exercises:dr.sc. Igor Urbiha prof.vis.šk.				
Course objectives	To teach students how to use the acquired knowledge in Statistics in solving engineering problems				
Learning outcomes:	1.ability to reach a conclusion about a random event, according to a definition. Level:6,7 2.ability to calculate probability according to the traditional formula "a priori" and through the axiom based probability . Level:6 3.ability to reach a conclusion about the basic properties of the probability function. Level:6,7 4.ability to organise the implementation of conditional probability. Level:6,7 5.ability to relate the notion of independence of an event to the solution to a problem. Level:6,7 6.ability to reach a conclusion about a discrete variable and its distribution, according to a definition. Level:6,7 7.identify whether a discrete random variable has an uniform, Bernoulli or some other distribution. Level:6 8.ability to reach a conclusion about a continuous random variable and its distribution of probability, especially in regard with normal distribution . Level:6,7 9.ability to reach a conclusion about the validity of a hypothesis based on statistical tests. Level:6,7				
Methods of carrying out lectures	Ex cathedra teaching Discussion Questions and answers				
Methods of carrying out auditory exercises	Other				
Course content lectures	1.Descriptive statistics: frequency tables, histogram, cumulative function, 2h 2.Arithmetic mean, mode, median, quartile, percentile, quantile, 2h 3.Variance, standard deviation, Chebyshev theorem, comparison of different measurement, comparison of different results, 2h 4.Linear regression, 2h 5.1st exam, 2h 6.Random event, probability , 2h, Learning outcomes:1,2,3,4,5 7.Discrete random variable, distribution of a discrete random variable, 2h, Learning outcomes:6 8.Probability density function, probability distribution function, expectation, variance and standard deviation of a discrete random variable, 2h, Learning outcomes:6 9.Discrete uniform distribution, Bernoulli trial, Bernoulli scheme, binomial distribution, Poisson distribution, 2h, Learning outcomes:7 10.2nd exam, 2h, Learning outcomes:1,2,3,4,5,6,7 11.Continuous random variable, 2h, Learning outcomes:8 12.Normal (Gaussian) distribution, standard normal distribution, chi squared distribution, 2h, Learning outcomes:8 13.Testing a hypothesis for expectation with known variance, 2h, Learning outcomes:9 14.Chi squared test, 2h, Learning outcomes:9 15.3rd exam, 2h, Learning outcomes:8,9

Course objectives	To teach students how to solve simple problems and implement computing algorithms by using contemporary structural and procedural programming languages				
Learning outcomes:	1.ability to analyse the C code. Level:6 2.ability to manage the basic programming tools (text editor, compiler, connector, debugger). Level:6,7 3.ability to design a simple algorithm by using programming tools (flowchart, pseudo code, structogram). Level:6 4.ability to anticipate the result of carrying out a segment of the C code, with predefined data input. Level:6,7 5.ability to design one's own programs with basic data types and structures. Level:6 6.ability to present the types and structures of files in everyday usage. Level:6,7 7.ability to design one's own programs with basic data types and structures. Level:6 8.ability to test an algorithm or a program code to find errors. Level:6 9.ability to redesign the C code according to an additional functional request. Level:6,7 10.ability to redesign one's own program according to a default file and operating system . Level:6,7 11.ability to develop an algorithm for solving a simple task. Level:6,7 12.ability to write a default or predefined simple algorithm in C. Level:6,7				
Involvement of learning outcomes of the course in study programme:	1.1.OPČI Služiti se stranim jezikom u literaturi i svakodnevnoj stručnoj komunikaciji. : 10h in 210h 1.2.OPČI Primijeniti znanje matematike i fizike na inženjerske probleme.: 10h in 210h 1.3.OPČI Koristiti tehnike, vještine i suvremene alate neophodne za inženjersku praksu.: 10h in 210h 1.4.OPČI Povezati inženjerske aktivnosti konstruiranja, proizvodnje i marketinga s potrebama korisnika proizvoda i usluge.: 10h in 210h 1.5.OPČI Identificirati, modelirati i rješavati inženjerske probleme.: 10h in 210h 2.1.OSOBNE Znanje o suvremenim pitanjima struke i društva.: 10h in 210h 2.2.OSOBNE Odgovornost, dosljednost, točnost, ažurnost.: 10h in 210h 2.3.OSOBNE Etički i moralni pristup radu.: 10h in 210h 2.4.OSOBNE Kriitička evaluacija argumenata, pretpostavki i podataka u cilju stvaranja mišljenja i pridonosa rješenju problema.: 10h in 210h 2.7.OSOBNE Predstavljanje informacija, ideja, problema i rješenja stručnoj i općoj publici.: 10h in 210h 2.9.OSOBNE Profesionalna i ljudska osobnost.: 10h in 210h 2.10.OSOBNE Prilagodljivost novim tehnologijama i tehnikama kao dio procesa cjeloživotnog učenja.: 10h in 210h 2.11.OSOBNE Otvorenost za nova znanja, iskustva i kulturne okolnosti.: 10h in 210h 2.12.OSOBNE Fleksibilnost i prilagodljivost u iznalaženju tehničkih rješenja uz neupitno poštivanje temeljnih etičkih načela, pravnih normi i pravila struke.: 10h in 210h 3.1.RAC Analizirati kod, predvidjeti ponašanje, ispitivati ispravnost algoritma ili programa napisanog u pseudo kodu ili poznatom programskom jeziku: 10h in 210h				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Discussion Questions and answers				
Methods of carrying out auditory exercises	Group problem solving Discussion, brainstorming Computer simulations Interactive problem solving Algorithm and problem tasks solving. Demonstration of programming tools based on typical algorithm examples.				
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations Individual student work on algorithm development and implementation, as well as existing code modification				
Course content lectures	1.Introductory lecture, 3h, Learning outcomes:2 2.Programming languages history, first C-program, variables, 3h, Learning outcomes:1,2,3,4,5,6 3.Number systems, variable types, 3h, Learning outcomes:1,2,3,4,5,6,7,8 4.Algorithm definition, expressions and operators, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11 5.Program flow control, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 6.Loops, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 7.Arrays, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 8.Functions, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 9.Pointers, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 10.Pointers and functions, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 11.Pointers and arrays, dynamic memory allocation, recursion, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 12.Character arrays (strings), formatted input and output, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 13.Formatted files and structures, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 14.Unformatted files and unions, 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 15.Advanced programming techniques (function pointers, variable number of parameters, important algorithms overview), 3h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12				

Course content auditory	1.Introduction, 1h, Learning outcomes:1 2.First C-program, 1h, Learning outcomes:1,2,3,4,5 3.Number systems, 1h, Learning outcomes:1,2,3 4.Operators and expressions, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 5.Program flow control, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 6.Loops, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 7.Arrays, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 8.Functions, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 9.Pointers, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 10.Pointers and functions, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 11.Pointers and arrays, dynamic memory allocation, recursion, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 12.Character arrays (strings), formatted input and output, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 13.Formatted files and structures, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 14.Unformatted files and unions, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 15.Practicing and repetition, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12
Course content laboratory	1.Number systems, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 2.Operators and expressions, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 3.Flow control, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 4.Loops, 2h, Learning outcomes:1,2,3,4,5,6,8,9,11,12 5.First programming skills exam (exercises 1-4), 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 6.Arrays, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 7.Functions, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 8.Pointers and functions, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 9.Pointers and arrays, dynamic memory allocation, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 10.Second programming skills exam (exercises 5-8), 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 11.Formatted files and structures, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 12.Unformatted files, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 13.Single exercise compensation, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11,12 14.Third programming skills exam (exercises 9-10), 2h 15.Not in program, 2h
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector
Exam literature	Osnovna: 1. T. Tucaković: C programer za 15 dana, PRO-MIL 2. L. Ullman, M. Liyanage: C osnove programiranja, MIŠ Additional literature: 1. B.W. Kernighan, D.M. Ritchie: The C Programming Language, Prentice Hall
Students obligations	Practical assignments.
Knowledge evaluation during semester	Redovitost pohaa predavanja. Blic provjere znanja na predavanjima. Kolokvij. Prakti rad. Prakti ispit.
Knowledge evaluation after semester	Pismeni ispit. Usmeni ispit. Prakti rad.
Student activities:	Aktivnost (Written exam) ECTS 7
Remark	This course can be used for final thesis theme
Prerequisites:	No prerequisites.

Course objectives	To teach students how to use the acquired knowledge in solving engineering tasks				
Learning outcomes:	1.ability to analyse a subject related to the field of expertise. Level:6 2.ability to prepare the sources (literature, etc.). Level:6,7 3.ability to write a seminar paper related to the field of expertise. Level:6,7 4.ability to formulate conclusions. Level:6,7 5.ability to format task based documents. Level:6 6.ability to prepare a presentation of a work related to the field of expertise. Level:6,7 7.ability to present a work related to the field of expertise to the audience. Level:6,7				
Methods of carrying out lectures	Case studies Discussion Other				
Methods of carrying out seminars	Traditional literature analysis Data mining and knowledge discovery on the Web Discussion, brainstorming Computer simulations Workshop Other				
Course content lectures	1.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 2.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 3.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 4.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 5.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 6.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 7.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 8.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 9.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 10.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 11.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 12.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 13.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 14.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7 15.In cooperation with the mentor., 2h, Learning outcomes:1,2,3,4,5,6,7

Course objectives	To transfer to students the knowledge and skills related to solving practical problems by using nonconventional computing methods				
Learning outcomes:	<p>1.ability to write a code of an application which uses genetic algorithms or neural networks. Level:6,7</p> <p>2.ability to combine various non-conventional programming techniques . Level:6,7</p> <p>3.ability to discover a configuration of genetic algorithms or neural networks parameters which give the best results. Level:6,7</p> <p>4.abilityto solve a problem which does not allow using the usual methods of code writing. Level:6</p> <p>5.ability to analyse the results gotten by using non-conventional ways of programming. Level:6</p> <p>6.ability to design a system suitable for using non-conventional ways of programming. Level:6</p> <p>7.abilityto identify a scenario for using genetic algorithms and neural networks. Level:6</p> <p>8.ability to formulate the rules of fuzzy logic in a fuzzy system. Level:6,7</p> <p>9.ability to prepare samples as a basis of neural networks study. Level:6,7</p> <p>10.ability to make a report which documents on the results of a system which uses non-conventional programming procedures. Level:6,7</p>				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Simulations				
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations Group problem solving Computer simulations				
Course content lectures	<p>1.Non-conventional computing procedures, 2h, Learning outcomes:2,4,6</p> <p>2.Genetic algorithms, 2h, Learning outcomes:1,7</p> <p>3.Java and implementation of genetic algorithms with jGAP library, 2h, Learning outcomes:1,3,7</p> <p>4.Introduction to neural networks, 2h, Learning outcomes:1,3,7</p> <p>5.Learning methods of neural networks, 2h, Learning outcomes:1,2,3,7,9</p> <p>6.First partial exam, 1h, Learning outcomes:1,2,3,4,5,6,7</p> <p>7.Using neural network with Encog framework and Java programming language , 2h, Learning outcomes:1,3,9</p> <p>8.Analysis of image recognition example with neural networks, 2h, Learning outcomes:1,3,9</p> <p>9.Neuroph framework, 2h, Learning outcomes:2,3,4,5,6,9</p> <p>10.Second partial exam, 1h, Learning outcomes:1,2,3,4,5,6,7,9</p> <p>11.Fuzzy logic, 2h, Learning outcomes:2,4,5,6,8</p> <p>12.Problem solving using fuzzy logic, 2h, Learning outcomes:2,4,5,6,8</p> <p>13.Fuzzy systems implementation, 5h, Learning outcomes:2,4,5,6,8</p> <p>14.Java implementation of jFuzzyLogic library, 2h, Learning outcomes:2,4,5,6,8</p> <p>15.Final exam, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9</p>				
Course content laboratory	<p>1.No classes, 2h</p> <p>2.No classes, 2h</p> <p>3.No classes, 2h</p> <p>4.Solving simple problems using genetic algorithms and jGAP library, 2h, Learning outcomes:1,2,3,4,5,6,7,10</p> <p>5.Solving simple problems using genetic algorithms and jGAP library, 2h, Learning outcomes:1,2,3,4,5,6,7,10</p> <p>6.Solving complex problems using genetic algorithms and jGAP library, 2h, Learning outcomes:1,2,3,4,5,6,7,10</p> <p>7.Solving complex problems using genetic algorithms and jGAP library, 2h, Learning outcomes:1,2,3,4,5,6,7,10</p> <p>8.Solving simple problems using neural networks and Encog framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>9.Solving simple problems using neural networks and Encog framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>10.Image recognition using neural networks and Encog framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>11.Image recognition using neural networks and Encog framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>12.Events prediction using neural networks and Neuroph framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>13.Events prediction using neural networks and Neuroph framework, 2h, Learning outcomes:1,2,3,4,5,6,7,9,10</p> <p>14.Solving simple problems using fuzzy logic and jFuzzyLogic library, 2h, Learning outcomes:2,4,5,6,8,10</p> <p>15.Solving simple problems using fuzzy logic and jFuzzyLogic library, 2h, Learning outcomes:2,4,5,6,8,10</p>				
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector				
Exam literature	Basic literature: 1. J.-S. R. Jang, C.-T. Sun, E.Mizutani: Neuro-Fuzzy and Soft Computing, Prentice Hall, 1997 Additional literature: 1. M. Friedman, A. Kandel: Introduction to pattern recognition: Statistical, structural, neural, and fuzzy logic approaches, World Scientific Publishing Co., Singapore, 1999 2. L. Dawis (ed.): Handbook of genetic algorithms, Van Nostrand Reinhold, NY, 1991. Jeff Heaton, Programming Neural Networks with Encog 3 in Java, 2011.				
Students obligations	Solving all six laboratory exercises.				
Knowledge	Six laboratory exams - 60 points				

evaluation during semester	Two partial exams - 10 points each Final exam - 20 points Optional points for additional effort Maximum 100 points 0-49 - not good enough 50-61 - sufficient 62-74 - good 75-86 - very good 87-100 - excellent
Knowledge evaluation after semester	Written exam is evaluated with 40 points, and remaining 60 points are transferred from the achievement on laboratory exams during the semester time.
Student activities:	Aktivnost ECTS (Written exam) 6
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Programiranje u jeziku Java
Proposal made by	Aleksander Radovan, BSc. engineer, lecturer, 16.12.2013.

Course objectives	To enable students to practically solve office informatization tasks on various operating systems.				
Learning outcomes:	1.ability to build a DNS server on UNIX OS. Level:6 2.ability to devise a Web server on UNIX OS. Level:6 3.ability to integrate a database with a Web server on UNIX OS. Level:6,7 4.ability to build a system for time based starting of a service. Level:6,7 5.ability to create a shared file system. Level:6,7 6.ability to control packages which pass through a security network layer on UNIX server. Level:6,7 7.ability to create an e-mail server. Level:6,7 8.ability to connect an e-mail filtering service with an e-mail service. Level:6,7 9.ability to analyse the network traffic going through security layer on UNIX OS. Level:6 10.ability to identify errors committed in setting up UNIX system services. Level:6 11.ability to test the functioning of services on UNIX server. Level:6				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Simulations Discussion				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Laboratory exercises, computer simulations				
Course content lectures	1.Domain name system, 2h, Learning outcomes:1,11 2.Domain name system administration, 2h, Learning outcomes:1,11 3.Web server configuration., 2h, Learning outcomes:2,11 4.Integration of server side languages into web server., 2h, Learning outcomes:2,11 5.Databases, 2h, Learning outcomes:3,11 6.Application scheduler., 2h, Learning outcomes:4,11 7.E-mail systems., 2h, Learning outcomes:7,11 8.E-mail server administration, 2h, Learning outcomes:7,11 9.E-mail server anti spam technologies., 2h, Learning outcomes:8,11 10.Incoming mail server protocols., 2h, Learning outcomes:7,8,11 11.Windows to UNIX sharing, 2h, Learning outcomes:5,11 12.Unix to Windows sharing, 2h, Learning outcomes:5,11 13.Firewall, 2h, Learning outcomes:9,11 14.Troubleshooting and backup, 2h, Learning outcomes:10,11 15.Theoretical exam, 1h, Learning outcomes:1,2,3,4,5,6,7,8,9,10,11				
Course content laboratory	1.-, 2h 2.Domain name system administration, 2h, Learning outcomes:1 3.Web server configuration., 2h, Learning outcomes:2 4.Integration of server side languages into web server., 2h, Learning outcomes:2 5.Databases, 2h, Learning outcomes:3 6.Application scheduler., 2h, Learning outcomes:5 7.-, 2h 8.E-mail server administration, 2h, Learning outcomes:7 9.E-mail server anti spam technologies., 2h, Learning outcomes:8 10.Incoming mail server protocols., 2h, Learning outcomes:7,8 11.Windows to UNIX sharing, 2h, Learning outcomes:5,11 12.Unix to Windows sharing, 2h, Learning outcomes:5,11 13.Firewall, 2h, Learning outcomes:9,11 14.Troubleshooting and backup, 2h, Learning outcomes:10,11 15.Practical exam, 2h, Learning outcomes:1,2,3,4,5,6,7,8,9,10				
Required materials	Special purpose computer laboratory Whiteboard with markers Overhead projector Special equipment				
Exam literature	Basic literature: 1. Materijali uz predmet (internet stranice) 2. C. Hunt,TCP/IP Network Administration, 3rd edition, O'Reilly, 2002. 3. S. Pritchard, et.all, LPI Linux Certification, 2nd edition, O'Reilly, 2006. Additional literature: 1. Linux Magazin (izdvojeni brojevi)				

Students obligations	Minimum of 13 point from laboratory work.
Knowledge evaluation during semester	Course is divided into 7 parts. Upon every part last one is checked with theoretical exam (3points x 6 parts) and practical work (1 point). At the end of the semester theoretical exam (21 point) and practical exam (54 point) checks all 7 parts. More information in first lecture in repository of the course.
Knowledge evaluation after semester	Laboratory points are obtained during semester. Additionally, theoretical exam (21 point) and practical exam (54 point) checks all 7 parts. More information in first lecture in repository of the course.
Student activities:	Aktivnost ECTS (Written exam) 5
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Uvod u UNIX sustave

Course objectives	To transfer to students the basic knowledge related to Web application design				
Learning outcomes:	1.ability to prepare a computer for a presentation of Web applications. Level:6 2.ability to distinguish between different programming tools for the development of client-site and server-site applications. Level:6 3.ability to make a project plan for the development of Web applications . Level:6,7 4.ability to combine the programming tools used for the development of Web applications. Level:6,7 5.ability to develop a database model. Level:6,7 6.ability to create a program module of a Web application. Level:6 7.ability to design a Web page. Level:6				
Methods of carrying out lectures	Ex cathedra teaching Guest lecturer Simulations Modelling Discussion Questions and answers Seminar, students presentation and discussion Lectures, examples from real life, creation methodology, independent work				
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations Group problem solving Discussion, brainstorming Interactive problem solving Workshop Other XAMPP virtual server				
Course content lectures	1.Introductory lecture and teach students about the responsibilities and teaching material., 2h, Learning outcomes:1 2.Introduction to HTML and what it is. Examples from practice. The difference between HTML and XHTML., 2h, Learning outcomes:2 3.Formatting an HTML document and create links. Definition of CSS and how to use it with the HTML document. Examples from practice., 2h, Learning outcomes:2 4.HTML5 forms, where they are used and what they do. Examples from practice. Model executing scripts on the server. HTTP POST and GET. Examples from practice., 2h, Learning outcomes:3 5.A client-server architecture, the characteristics of the client and the server, Apache Web server and how it works., 2h, Learning outcomes:3 6.Introduction to PHP scripting language, server side web applications., 2h, Learning outcomes:4 7.Examination of the first part of the theory, html, forms, CSS, basic web server and its function, php scripting language., 2h, Learning outcomes:4 8.PHP syntax and its usage, the PHP variables and labeling rules., 2h, Learning outcomes:5 9.Data types and strings, using operators and loops., 2h, Learning outcomes:5 10.Application of the loop in the programming environment, data fields, require and include commands., 2h, Learning outcomes:6 11.MySQL database, its application and what they do. Examples of how to create a relational database., 2h, Learning outcomes:6 12.Connecting PHP scripting language with the database, query the database and display the search results. Enter, change, and delete data from the database through the form., 2h, Learning outcomes:6,7 13.What is Javascript, which is its application and what it is used, examples in practice, 2h, Learning outcomes:6,7 14.Web application security, how to protect yourself and which are the most common forms of attacks on web applications, 2h, Learning outcomes:7 15.Examination of the second part of the theory, php (syntax, data types, data fields, loops), MySQL database, SQL queries to the database, XML, RSS., 2h				
Course content laboratory	1.Introductory exercises teach students about the duties and educational materials, and prepares the computer to work with the scripting language., 2h, Learning outcomes:1 2.Installing Virtual Server on the computer, learning about their work environment. It takes practice to install Apache, MySQL database and FTP client., 2h, Learning outcomes:2 3.Solving the task and making HTML pages. Using only simple programs that do not have a GUI (Notepad + +, UltraEdit, Notepad, Wordpad), the knowledge of writing HTML code, verification and validation code., 2h, Learning outcomes:2 4.Solving the task and making the HTML code with the added document formatting using CSS tools. Using only simple programs that do not have a GUI (Notepad + +, UltraEdit, Notepad, Wordpad), the knowledge of writing CSS code, verification and validation code., 2h, Learning outcomes:2 5.Creating forms using a text editor. Check funkcionalnosti for HTTP POST and GET. Solving problems with the forms and print text on the screen. Work on the local computer with virtual services in open source environment., 2h, Learning outcomes:3 6.Repetition of knowledge and development of Internet sites on a virtual server using HTML markup text, forms, CSS, PHP., 2h, Learning outcomes:3 7.Examination of the first part of practice, HTML, forms, CSS, basic web server and its function, php scripting language.,				

	2h, Learning outcomes:4 8.Introducing the virtual environment Xampp applications, run applications required for operation of the virtual server, solving tasks., 2h, Learning outcomes:4 9.Solving problems using PHP syntax, PHP variables and labeling rules in HTML, 2h, Learning outcomes:5 10.Solving problems in PHP, data types, strings, use the operator and the loop, 2h, Learning outcomes:5 11.Application of the loop in the programming environment, data fields, require and include commands, 2h, Learning outcomes:5 12.Using MySQL database, creating databases, tables, fields in the table, define the fields, their values#8203;#8203;, the determination of the primary and secondary key., 2h, Learning outcomes:6 13.Connecting to MySQL database with the programming code in PHP, and the appointment of a query to the database (read data from the database, data modification and deletion of data), the print data from the database to display user, 2h, Learning outcomes:6,7 14.Rules creation of an XML document, and use the knowledge gained to make a RSS document according to data read from the database, 2h, Learning outcomes:6,7 15.Examination of the second part of the practice, php (syntax, data types, data fields, loops), MySQL database, SQL queries to the database, XML, RSS., 2h								
Required materials	Basic: classroom, blackboard, chalk... Special purpose computer laboratory Overhead projector Tools Special equipment Web server package

Code WEB/ISVU	23787/170065	ECTS	6.0	Academic year	2018/2019
Name	Web application development in ASP.NET MVC technology				
Status	6th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course 6th semester - (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			30+30 (0+30+0+0) 120	
Teachers	Lectures:1. Ivan Cesar mag. ing. Laboratory exercises: Ivan Cesar mag. ing.				
Course objectives	To introduce students to the ASP.NET MVC technology and qualify them for individual development of multilayer Web applications with a possibility of using a database.				
Learning outcomes:	1.to analyse data flow between a client and a server. Level:6 2.to develop a multilayer ASP.NET MVC application. Level:6 3.to anticipate potential problems in the development of an application. Level:6,7 4.to connect the URLs with corresponding actions on a server. Level:6,7 5.to design LINQ queries on collections and objects. Level:6 6.to integrate the Entity framework first into an ASP.NET MVC application . Level:6,7 7.to control the authorization and authentication mechanisms. Level:6,7 8.to combine client libraries with asynchronous requests to the server. Level:6,7 9.o create mechanisms of master-detail data binding in a single request to the server. Level:6,7 10.API interface using Web API 2 technology. Level:6,7				
Methods of carrying out lectures	Ex cathedra teaching Case studies Demonstration Discussion Seminar, students presentation and discussion				
Methods of carrying out laboratory exercises	Laboratory exercises on laboratory equipment Data mining and knowledge discovery on the Web				
Course content lectures	1.C# language basics, 2h, Learning outcomes:1,2,3 2.Http protocol properties: request and response. Html forms, get, post., 2h, Learning outcomes:1,2,3 3.Model-view-controller paradigm concept. Multi-layer ASP.NET MVC application architecture., 2h, Learning outcomes:2,3,4 4.Connecting URL location with controller actions with additional URL parameters transfer (routing). URL appliaction areas., 2h, Learning outcomes:2,3,4 5.Authorization and authentication in ASP.NET MVC web applications., 2h, Learning outcomes:3,4,5 6.ASP.NET MVC razor nomenclature intro., 2h, Learning outcomes:4,5,6 7.LINQ, 2h, Learning outcomes:4,5,6 8.Model binding in ASP.NET MVC technology., 2h, Learning outcomes:5,6,7 9.Package manager console usage. Entity framework code-first technology and repository pattern, Entity framework code-first migrations., 2h, Learning outcomes:5,6,7 10.Basic principles of javascript and jQuery libraries. Principles of ASP.NET MVC ajax mechanisms. Partial views and user controls., 2h, Learning outcomes:6,7,8 11.Validation. Caching. Custom action filters., 2h, Learning outcomes:6,7,8 12.Testing controllers in ASP.NET MVC application., 2h, Learning outcomes:7,8,9 13.Deployment to production environment., 2h, Learning outcomes:7,8,9 14.Integrating Web API 2 interface into application, 2h, Learning outcomes:8,9,10 15.User-defined model binding. Binding between form data and collections (master-detail)., 2h, Learning outcomes:8,9,10				
Course content laboratory	1.Introduction to development environment (VS2013, chrome dev). C# basics., 2h, Learning outcomes:1 2.Http protocol properties: request and response. Html forms, get, post., 2h, Learning outcomes:1,2 3.Model-view-controller paradigm concept. Multi-layer ASP.NET MVC application architecture., 2h, Learning outcomes:2,3,4 4.Connecting URL location with controller actions with additional URL parameters transfer (routing). URL appliaction areas., 2h, Learning outcomes:2,3,4,5 5.Authorization and authentication in ASP.NET MVC web applications., 2h, Learning outcomes:3,4,5,6 6.ASP.NET MVC razor nomenclature intro., 2h, Learning outcomes:4,5,6,7 7.LINQ., 2h, Learning outcomes:5,6,7 8.Model binding in ASP.NET MVC technology., 2h, Learning outcomes:3,4,5,6,7 9.Package manager console usage. Entity framework code-first technology and repository pattern, Entity framework code-first migrations., 2h, Learning outcomes:3,4,5,6,7,8 10.Basic principles of javascript and jQuery libraries. Principles of ASP.NET MVC ajax mechanisms. Partial views and user controls., 2h, Learning outcomes:5,6,7,8 11.Validation. Caching. Custom action filters., 2h, Learning outcomes:6,7,8,9 12.Testing controllers in ASP.NET MVC application., 2h, Learning outcomes:7,8,9,10 13.Deployment to production environment., 2h, Learning outcomes:8,9,10 14.Integrating Web API 2 interface into application, 2h, Learning outcomes:9,10 15.User-defined model binding. Binding between form data and collections (master-detail)., 2h, Learning outcomes:10				
Required materials	Basic: classroom, blackboard, chalk... Special purpose computer laboratory Overhead projector				
Exam literature	1. I. Cesar elektronički sadržaji predavanja (PPT prezentacije) na web stranici predmeta na Tehničkom veleučilištu u Zagrebu, 2013., www.tvz.hr				

	2. A. Freeman, Pro ASP.NET MVC 4, Apress, 4th edition, 2012
Students obligations	Exercises and lectures attendance, 30% of maximum points in lab. exercises, project completeness.
Knowledge evaluation during semester	Lab exercises#12#60#30\$Practical work#1#40#50\$
Knowledge evaluation after semester	Oral exam#1#30#70\$Practical work#1#70#70\$
Student activities:	Aktivnost (Written exam) ECTS 6
Remark	This course can be used for final thesis theme
Prerequisites:	Students cannot enroll in this course unless they have passed Baze podataka Students cannot enroll in this course unless they have passed Objektno orijentirano programiranje
Proposal made by	Ivan Cesar , 22.5.2013

Code WEB/ISVU	23789/170067	ECTS	6.0	Academic year	2018/2019
Name	Web application in Java				
Status	6th semester - Computer systems and network engineering (Izvanredni raarstva) - elective course 6th semester - (Izvanredni raarstva) - elective course				
Teaching mode	Lectures + exercises (auditory + laboratory + seminar + methodology + construction) work at home			60+60 (0+60+0+0) 60	
Teachers	Lectures:1. v.pred. Aleksander Radovan , dipl. ing. Laboratory exercises: Matija Dujmović				
Course objectives	Mastering advanced techniques of software development and application frameworks in the Java programming language.				
Learning outcomes:	1.ability to write a Java Web application code to be executed on a server and used by means of a browser. Level:6,7 2.ability to design a Java Web application which will use a 3layer (MVC) architecture. Level:6 3.ability to organise the application components on an interface, the business logic and data layer. Level:6,7 4.ability to relate elements of the application to new open source libraries. Level:6,7 5.ability to develop one's own components based on the OOP reusable principles . Level:6,7 6.ability to adjust integrated development environment Spring Tool Suite for effective development of Java web applications. Level:6 7.ability to analyse the functional elements of the application and adjust them to the MVC architecture. Level:6,7 8.ability to integrate a Java Web application with different software frameworks which speed up the development. Level:6 9.compare a development process of JavaFX applications with development process of web applications. Level:6,7 10.choose Spring boot framework for development process optimization. Level:7 11.choose Tyhmeleaf for developing a front end user interface. Level:7 12.Design internationalization in java web application. Level:6 13.Integrate scheduled jobs to Java web applications. Level:6				
Methods of carrying out lectures	Ex cathedra teaching Guest lecturer Case studies Demonstration Discussion Seminar, students presentation and discussion				
Methods of carrying out laboratory exercises	Laboratory exercises, computer simulations Computer simulations				
Course content lectures	1.Introductory lecture, 2h 2.Java web application introduction, 2h, Learning outcomes:10 3.Introduction to Spring framework, 2h, Learning outcomes:2,3,4,5,6,7,8,10 4.Spring MVC, 2h, Learning outcomes:2,3,4,5,6,7,8,10 5.Java web application scopes, 2h, Learning outcomes:4,10 6.Thymeleaf, 2h, Learning outcomes:11 7.Spring Security, 2h, Learning outcomes:4,7 8.Web application and databases, 2h, Learning outcomes:4,7,10 9.Midterm Exam, 2h 10.Spring Data JPA, 2h, Learning outcomes:4,10 11.Hibernate, 2h, Learning outcomes:4,6,9,10 12.Spring MVC REST and Quartz scheduler, 2h, Learning outcomes:2,3,4,9,13 13.Spring Boot and internationalization, 2h, Learning outcomes:10,12 14.jUnit testing, 2h, Learning outcomes:4 15.Final exam, 2h				
Course content laboratory	1.No classes, 2h 2.No classes, 2h 3.Simple Java web application with GET and POST requests, 2h, Learning outcomes:1,6 4.Application scopes in Java web application, 2h, Learning outcomes:1,4 5.Thymeleaf, 2h, Learning outcomes:1,4,8,9 6.Spring Security, 2h, Learning outcomes:1,4,6,10 7.Connecting Java web applications to database, 2h, Learning outcomes:1,2,3,4,5,7,9 8.Spring Data JPA, 2h, Learning outcomes:1,2,3,4,5,7,9 9.Hibernate, 2h, Learning outcomes:1,2,3,4,5,7,9 10.Spring MVC REST, 2h, Learning outcomes:5,7 11.Spring Boot, 2h, Learning outcomes:10 12.jUnit testiranje, 2h, Learning outcomes:1,4,6,7 13.Final Exam, 2h 14.Laboratory exercises makeup, 2h 15.Laboratory exercises makeup, 2h				
Required materials	Basic: classroom, blackboard, chalk... General purpose computer laboratory Whiteboard with markers Overhead projector				
Exam literature	Spring in Action, 5rd Edition, Manning, 2018. Web development with Java, using Hibernate, JSPs and Servlets Springer 2007. Pro Apache Tomcat 6 Apress, 2007. Head First Servlet and JSP 2nd edition O'Reilly, 2008.
